List update (Dec.07)

All Listed are assumed to be NTSC unless stated otherwise!

**007 Racing** - Runs, but is unplayable due to massive skipping -chillin\_dude

1 Xtreme

102 Dalmatians Puppies To The Rescue

2 Xtreme

3 Xtreme

3D Baseball

40 Winks

A - Train

**A Bug's Life** NO freezes at load screen -krackheadbill

**Abe's Exoddus** Yes, HLE didn't work, BIOS = worked but there some strange montion bug. -jizzlobber

**Abe's Oddysee** Must run through bios. Yes, game works full speed and playable, BUT severe graphic redraw issues (ghosting effects) -falz

**Aconcagua (NTSC-J) (2CD) [SCPS-10131 & 10132]** BIN/CUE - Works with default bios settings (v18) -Retroplay

**Ace Combat 2** Runs perfectly in HLE - menus wouldn't show up on the first load but quit game, reload and they work - Xustu

**Ace Combat III** - (BIN/CUE) - Works perfectly with standard bios settings. Played through first level with no problems. Your plane looks goofy in the replay scenes when the level ends, but that seems to be the only problem. (v18) -ressurrectionx

Aces of the Air

**Action Bass** Bin/Cue Works nicely with Standard Bios settings, only drawback is that the "FISH ON" music is choppy and too fast. All the other sounds are as they should be (v18) -sotu

Action Man: Operation Extreme

**Activision Classic Games** - YES, slight pause in menu screen. - HSDEMONZ

Adidas Power Soccer

**Adventure of Phix** Bin/Cue Works Perfectly with Standard Bios Settings (v18) -sotu

**Adventures of Lomax, The** Yes, Works 100% in bios, it is EXACT perfect emulation. -blitz6

**Adventures of Lomax PAL**, works great in BIOS mode. -Retroplay

**Agile Warrior F111X** Img/Ccd/Sub works perfectly with standard settings and Disable CDDA in order to get rid of a really loud and disturbing buzzing sound (v18) -sotu

**Air Combat** Yes, HLE - Runs Intro (No Music), Setup, options, etc. - Hangs on GAME START (freezes EMU), BIOS - Runs (NO BGM)

Sounds YES Game runs great -dgb1891

**Akuji The Heartless** Img/Ccd/Sub Works quite well only minor slowdown with Standard Bios Settings w/ Frameskip and Framelimit turned OFF. I get a nasty sound reverb so Disable CDDA needs to be ON. Very Playable (v18) -sotu

Alexi Lalas International Soccer

**Alien Resurrection** Yes, works with original BIOS. Can't wait till the emu supports analog control. -Xdelusion

**Alien Trilogy** Bin/Cue Works perfectly with Standard Bios Settings. Once screen goes black for a few moments press A to start the game (v18) -sotu

**Alien Trilogy PAL** - Does not work. -joshwaan2k

**All Japan Pro Wrestling: Kings Soul** Yes, Working but just a tad slow –spite

All Star Baseball '97

All Star Slammin D-Ball

Allied General

**Alone in the Dark 4: The New Nightmare PAL** Yes, Works, no errors and good speed. - Dante\_Ali

**Alone In The Dark: One Eyed Jacks Revenge** Doesn't work in either Bios or HLE mode -bigdaddy51200

**Alone in the Dark Jack is Back PAL** - Freez at first screen -Kuis

**Alundra** IMG/CUE Runs perfect in Bios mode. No sound or slowdown issues. Freezes at start in HLE (v18) -BrokenWing Mike

**Alundra II** - (IMG/CCD/SUB) - Runs perfect in Bios Mode. No sound or slowdown issues. Played through first 15 minutes of game. (v18) -ressurrectionx

Andretti Racing

Animaniacs: Ten Pin Alley 2

Animorphs Shattered Reality

**Anna Kournikova Smash Court** Yes, works gfx glitch cpu player has no actions -jammi

**Ape Escape** Loads, but doesn't get past "Dual Shock controller required to play this game" – rileg

Apocalypse

Aquanauts Holiday

**Arc the Lad 1** Bin/Cue Works with Standard Bios Settings (v18) -sotu

**Arc the Lad 2** works fine for me in hle mode -john doep // Img/Ccd/Sub/Cue Works perfectly with Standard Bios Settings (v18) -sotu

**Arc the Lad 3** Img/Ccd/Sub/Cue Works perfectly with Standard Bios Settings (v18) -sotu

**Arc the Lad Collection I** have tried both BIOS mode and HLE and can't get these to run. It locks on the "Loading" screen -arkinex

Arcade Party Pak

Arcades Greatest Hits: Atari Collection 1, The

Arcades Greatest Hits: Atari Collection 2, The

Arcades Greatest Hits: Midway Collection 2, The

Arcades Greatest Hits: Williams Collection

**Area 51** - (IMG/CCD/SUB) - Works with Standard Bios Settings, however screen is split down the middle and the right side is on the left side and vice versa. It is very annoying. I couldn't find a graphics fix to avoid this. (v18) -ressurrectionx

Arena Football Unleashed, Kurt Warner's

**Arkanoid 2000 (J)** - Intro music slightly skippy. Perfectly playable. 99% (Lazy screen updates, old frame skipping) -darkstalker

Armored Core 2: Project Phantasma

**Armored Core Armored Core** - Works great in BIOS with Old Frameskip: ON and Frameskip: OFF -chadkeck

Armored Core: Master of Arena

Armorines: Project S.W.A.R.M.

**Army Men 3D** Yes, HLE AND BIOS works flawless, except when you use right trigger to zoom, just remap and works fine. – superdave

Army Men: Air Attack 2

**Army Men: Air Attack** Bin/Cue fired up first try in Bios Mode, played through first level, no problems (v18) -Lepain

Army Men: Green Rogue

Army Men: Sarge's Heroes 2

**Army Men: Sarge's Heroes** NO, Loads menu but freezes half way to loading level -uglymonkey

Army Men: World War - Final Front

Army Men: World War - Land Sea Air

**Army Men: World War - Team Assault** Bin/Cue hung on loading screen in both Bios and HLE modes (v18) -Lepain

Army Men: World War

Arthur! Ready To Race

**Assault Retribution** IMG/CCD/SUB Works perfectly with standard bios settings, turn Frameskip and Framelimit OFF. This game kicks butt! (v18) -sotu

**Assault Rigs** Img/Ccd/Sub Works with standard settings, need to set Sound Timer Method in SPU Fixes to Original Method to help with some sound glitching -sotu // Opening FMV's has no XA sound at all despite tweaking. Other than that works great with some adjustments: Turn off all graphic fixes. In-game is perfect -barman1176

**Asteroids** Works great in BIOS mode but crashes at the press start screen in HLE mode -prican24

Atari Anniversary Edition Redux

**Atelier Elie (J)** - Appears to play perfectly. 100% (Frameskip, Framelimit) -darkstalker

**Atelier Marie Plus** (Playstation The Best - J) - [/b]Hardlocks the XBox upon starting it. 0% -darkstalker

ATV Quad Power Racing

**Austin Powers Pinball** - (BIN/CUE) - Works perfectly in Standard Bios Mode. Title screen and "New Line Cinema" screen seem to be blank upon some loads. If this happens, just press start when you hear the music and the game is 100% playable from there on. (v18) -ressurrectionx

Auto Destruct

**Azure Dreams** works fine 100% in BIOS mode, but freezes at language selection screen on HLE mode. -mozee

Backstreet Billiards  
Backyard Football 2001 [ CANCELLED ]  
Backyard Soccer  
**Ball Breakers** Bin/Cue Works Perfectly with standard settings Turn Frameskip and Framelimit OFF for best performance (v18) -sotu  
BallBlazer Champions  
**Ballistic - (BIN/CUE)** Works Perfectly with Standard Bios Settings. (v18) -ressurrectionx  
Barbie Explorer  
Barbie: Race & Ride  
Barbie: Super Sports  
Bases Loaded '96 Double Header  
Bass Landing & Fishing Controller  
Bass Rise Fishing  
Batman and Robin  
Batman Beyond: Return Of The Joker  
**Batman Forever: Arcade Game** Works with Bios and HLE -skabio  
Batman: Gotham City Racer  
**Battle Arena: Toshinden II - (IMG/CUE/CCD/SUB)** - Works Perfectly with Standard BIOS Settings. Minor graphical glitches upon load and on intro, but game plays fine. (v18) -ressurrectionx  
**Battle Arena: Toshinden III - (IMG/CUE/CCD/SUB)** - Works Perfectly with Standard BIOS Settings. (v18) -ressurrectionx  
**Battle Arena: Toshinden I - (IMG/CCD/SUB)** - Characters are invisible. Audio skips. (v18) -ressurrectionx  
**Battle Hunter** Bios- runs at full speed,lazy screen update ON. controller locks up alot jam on the buttons til it works HLE- music doesn't work and there are saving problems -deathx88  
BattleSport  
BattleStations  
BattleTanx Global Assault  
Bear In Big Blue House  
**Beast Wars Transformers** Doesn't work in HLE mode but works great in BIOS mode with minor audio/video prob with the intro - prican24  
**Beast Wars Transmetals** Goes through opening videos but no menu ever comes up. This is in both HLE and BIOS -skyblast  
**Beavis & Butt-head: Virtual Aho Shoukougun** - works in bios mode tho video's audio is choppy the game plays fine -prican24  
**Beyblade** Works fine in BIOS/HLE. The beginning movie sequence is a bit sketchy when it comes to sound. I'd say 96% (All CPU fixes off) -kokenjr  
**Beyond the Beyond - (BIN/CUE)** - Works Perfectly with Standard BIOS Settings. (v18) -ressurrectionx  
Big Air Snowboarding  
Big Bass Fishing  
**Big Strike Bowling** Yes, worked great - SniperKiller  
Big Bass World Championship  
Big Ol' Bass: Fishermans Bait 2  
Billiards  
**Bio F.R.E.A.K.S.** character selection screen messed up. some special moves don't show, yet do damage -xuphor  
**Bishi Bashi 3 JPN** runs perfectly in BIOS and in HLE -FrlEd-goAt  
**Bishi Bashi Special PAL** Yes, Works 100% if you turn frameskip off, awesome! -jizzlobber  
Black Bass with Blue Marlin  
**Black Dawn** Img/Ccd/Sub Works Perfectly with Standard Bios Settings. Annoying Buzz is avoided by turning Disable CDDA to ON (v18) -sotu  
Blade Arts  
**Blade** Yes, but worked slow & choppy - skorchir  
Blades of Steel 2000  
**Blast Chamber** loads fine in bios/hle, but controls don't work and seems to run too fast -BLoTt0\_AI  
Blast Lacrosse  
Blast Radius  
**Blastmaster Master: Blasting Again - (IMG/CUE/CCD/SUB)** - Works Perfectly in BIOS mode. Turn off Frameskip and turn on "old frame skipping" (v18) -ressurrectionx  
**Blastmaster Master 3** Yes, works with original BIOS -Xdelusion  
**Blasto!** Img/Ccd/Sub Works perfectly with Standard Bios Settings (v18) -sotu  
**Blaze & Blade - Eternal Quest** Img/Ccd/Sub Works perfectly using Standard Bios Settings with Framskip turned OFF and Sound Timer Method on ORIGINAL (v18) -sotu  
**Blazing Dragons** Works perfect in Bios, default settings (v18) -Mandoz  
**Blood Omen - Legacy of Kain** Img/Ccd/Sub Works Pefctly w/ Standard Bios Settings and Frameskip turned OFF (v18) -sotu  
Bloodlines?  
**Bloody Roar** (bin/cue) works fine. Sound may be a bit choppy and graphics may/may not run a observable bit smoother with framelimit off/frameskip on (v18) -taonaut

**Bloody Roar 2** (bin/cue) Works with default settings, but even better with framelimit OFF. The sound gets a bit choppy, but not too annoying (v18) -taonaut

Blue's Clues: Blue's Big Musical

**Bob The Builder: Fix It Fun** Yes, but with major sound glitches –Mars10

Bogey Dead 6

**Bomberman Fantasy Race** - (ISO) - Plays a bit slow and music is choppy in BIOS mode. (v18) -ressurrectionx

**Bomberman Party Edition** (img/ccd/sub/cue) works fine, but I didn't get it to work properly with multitap enabled (If I, in BIOS, choose all controllers as DualShocks I got the game to start and accept input from controller 1 and 2, but still not 3 and 4. In HLE I got the game to start with multitap enabled without having to change controller config, but then no controller input at all is accepted) (v18) -taonaut

**Bomberman World** - (IMG/CUE/CCD/SUB) - Works Perfect with Standard BIOS settings. (v18) -ressurrectionx

**Bombing Islands** Bios mode, disable CDDA on or else you have an annoying buzzing noise at the title screen and when the timer counts down (v18) -Lepain

**BoomBots** - (IMG/CCD/SUB) - Seems to work perfect in with Standard BIOS Settings. May be a little slow, but fully playable. (v18) -ressurrectionx

Bottom Of The 9th 97

Bottom Of The 9th 99

Bottom Of The 9th

Bowling

Boxing

**Brahma Force** Img/Ccd/Sub Works Perfectly w/ Standard Bios Settings (v18) -sotu

Brain Dead 13

**Brave Fencer Musashi** - (IMG/CUE/CCD/SUB) Works perfect in BIOS mode with frameskip off. Character's voices seem to skip a little, but are still completely understandable. (v18) -ressurrectionx

Bravo Air Race

**Breakout 3D** (ISO/CUE) - Works perfect in BIOS mode with old frameskip and framelimit ON, frameskip OFF. Music works perfect. (v18) -ressurrectionx

**Breath of Fire III** - (BIN/CUE) - Works Perfect with Standard BIOS Settings. (v18) -ressurrectionx

**Breath of Fire IV** - (BIN/CUE) - Works Perfect with Standard BIOS Settings. Throttle will screw up some of the FMV graphics, but won't ruin the game. Use throttle at your own discretion. (v18) -ressurrectionx

**Brigandine** - Bios mode - .Disable CDDA sound to get rid of the buzz.Graphical glitch in opening movie.Possible glitches crashes later on,only briefly tested. -darklegion

Broken Helix

**Broken Sword 2: The Smoking Mirror** No, does not work - hangs at loading... -tyronesoft

**Broken Sword PAL** Works in BIOS mode only, slow and speech in dialogues have problems –cescone

**Broken Sword I: The Shadow of the Templars** - (BIN/CUE) - Works Perfect with Standard BIOS Settings. (v18) -ressurrectionx

Brunswick Circuit Pro Bowling

Brunswick Circuit Pro Bowling 2

**Bubble Bobble 2** works perfect in bios, will not work in HLE -deathx88

**Bubble Bobble Combo** (Img/Ccd/Sub & bin/cue): Works Perfectly w/ Standard Bios Settings AND "Sound Timer Metod:" set to "Original" (v18) -taonaut

**Bussy 3D** (IMG/CCD/SUB) - Works in BIOS mode. I never played the original, so I'm not sure if this is perfect. Gameplay seems lousy as if it is a little slow. Tried switching old frame skipping which didn't help. Turning off Framelimit makes video scenes run way too fast. (v18) -ressurrectionx

Bug Riders: The Race of Kings

**Bugs Bunny & Taz Time Busters** (IMG/CCS/SUB) - I wasn't able to get this to work right. Messed around with some graphics, CPU and sound settings but the video scenes play way too fast. I was able to slow them down a bit, but even just loading the game is unbearably slow then. Can probably be fixed if somebody took the time to do it. Game seems to work otherwise. (v18) -ressurrectionx

**Bugs Bunny Lost in Time** (IMG/CUE/CCD/SUB) - Works Perfect with Standard BIOS Settings. Seems to be a very small amount of graphical glitches. (V18) -ressurrectionx

**Builder s Block** (IMG/CUE/CCD/SUB) - Works Perfect with Standard BIOS Settings. (v18) -ressurrectionx

Burning Road

Burstrick Wake Boarding

**Bushido Blade II** - (BIN/CUE) - Works Perfect in BIOS mode. Switch to Old Frameskipping. (v18) -ressurrectionx

**Bushido Blade** Img/Ccd/Sub/Cue Works Perfectly w/ Standard Bios Settings (v18) -sotu

**Bust A Groove I** - (BIN/CUE) - Works in BIOS mode. Audio slows down at times when you make selections on the menu. Gameplay seems tricky... might be out of sync with music. (v18) -ressurrectionx

**Bust a Groove (PAL)** - Works great graphically, but timing out of sync. (Bios) -seph200x

**Bust A Groove II** - (IMG/CUE/CCD/SUB) - Works in BIOS mode. Gameplay seems tricky... might be out of sync with music. (v18) -ressurrectionx

**Bust a Move II: Arcade Edition** - (BIN/CUE) - Works in Bios mode. Audio gets choppy on occasion, but gameplay is flawless

otherwise. (v18) -ressurrectionx

**Bust a Move IV** - (BIN/CUE) - Works in BIOS mode. Audio gets choppy on occasion, but gameplay is flawless otherwise. (v18) -ressurrectionx

**Bust a Move '99** - (IMG/CCD/SUB) - Works in BIOS mode. Seems to be some minor audio glitches. Gameplay seems to be flawless otherwise. (v18) -ressurrectionx

Buster Brothers Collection

Buzz Lightyear of Star Command

**C: The Contra Adventure** Bios/HLE- runs at full speed, graphics are whack later on. Fix misson briefing menu by turning old frameskip ON and the rest OFF, the pause menu in 3d mode still doesn't work. Also the music is this buzzing noise so disable the CDDA. unmap the throttle -deathx88

**C-12: Final Resistance No Good** in BIOS or HLE - xboot

**Cabela's Big Game Hunter** Bin/Cue Works perfectly with standard bios settings, Turn Frameskip OFF (v18) -sotu

**Cabela's Ultimate Deer Hunt** Bin/Cue Works perfectly with standard bios settings, Turn Frameskip OFF (v18) -sotu

**Caesar's Palace 2** IMG/CCD/CUE/SUB Works perfectly with standard bios settings, Turn Frameskip OFF so loading screens work (v18) -sotu

**Caesar's Palace 2000** plays perfectly in Bios mode -DaGamePimp

**Caesar's Palace** IMG/CCD/SUB Loads up just fine but I'm having trouble getting past the cashier. Will test more later but for now only partially working (v18) -sotu

Capcom vs DNK Pro

**Capcom Vs. SNK Millennium Fight 2000 Pro** - Works great in both modes -prican24

**Capcom vs SNK Pro** Yes, works cool but video sound glitches and game crash when letting demo to play -radius

**Captain Commando (J)** IMG/CCD/SUB/CUE Runs near perfect with standard bios settings except for a graphics glitch with the first boss (v18) -sotu

**Card Games** Bin/Cue Works perfectly with standard bios settings (v18) -sotu

**Cardinal Syn Works** - perfectly in hle and bios only small problem is the only cdda track in the game that plays on the menus runs in a endless 5 second loop. -gamemaster14

Carmageddon

**Carnage Heart** Img/Ccd/Sub Works Perfectly w/ Standard Bios Settings. Turn Disable CDDA to ON and Sound Timer Method to ORIGINAL (v18) -sotu

**Carnage Heart PAL** works perfectly with HLE -mothra

**Cart World Series** IMG/CCD/CUE/SUB Works well, a little slow for a formula 1 racing game. Standard Bios settings, Frameskip and Framelimit OFF, Key to getting it working is Turning ON Use CPU interpreter in CPU FIXES (v18) -sotu

**Casper Friends Around the World** Bin/Cue Loads and runs at around 40% very slow with sound glitches. Might work better with future emu updates (v18) -sotu

**Casper** Bin/Cue First zone loads with standard settings but Errors SPU Timeout, status: 7 when you zone into other rooms (v18) -sotu

**Castlevania Chronicles** - (BIN/CUE) - Works perfectly in BIOS mode. Set "Interpolation" to simple and "Sound Timer Method" to Original. (v18) -ressurrectionx

**Castlevania Chronicle JPN version** /W Pcsxbox 113 Bios mode Working Perfectly, Almost NO slowdown. -PrTv

**Castlevania: Symphony of the Night** version 13 BIOS, all default, Nearly Perfect, some slowdowns, very minor graphic glitches 97% -tagler

**Castlevania: Symphony of the Night** - (BIN/CUE) - Works Perfectly with Standard Bios Settings. (v18) -ressurrectionx

**Castrol Honda Superbike Racing** Bios/HLE works perfectly. -skabio

**Cat in the Hat** Img/Ccd/Sub - Works 100% with default settings (v18) -louderthan

**Centipede** Bin/Cue Works perfectly with standard bios settings, might actually be a little too fast (v18) -sotu

**Champion Wrestler** Yes, but a tad bit slow -spite

**Championship Bass** Yes, jittery menu's and slow in game

**Championship Motocross** IMG/CCD/SUB Works perfectly with standard bios settings (v18) -sotu

**Championship Motocross 2001** - Works with both bios and HLE 100% -XenShocker

**Championship Snooker** (BIN/CUE) A bit skippy but otherwise good in BIOS mode (v18) -Lempt

**Championship Surfer** IMG/CCD/SUB Works perfectly with standard bios settings. Turn Disable CDDA ON in CPU Fixes to get rid of the buzzing (v18) -sotu

**Checkmate II (E)** - Works perfectly. Everything seems to be great. 100% (Frameskip,framelimit) -darkstalker

**Cheesy** IMG/CCD/SUB Works perfectly with standard bios settings, Turn Disable CDDA to ON to get rid of the in game buzzing (v18) -sotu

**Chess** IMG/CCD/SUB Works perfectly but the music is terrible. To keep the game narrator but remove the annoying music turn XA Sound OFF in SPU FIXES (v18) -sotu

Chessmaster Millenium

**Chessmaster 2** IMG/CCD/SUB/CUE Works perfectly, to remove the annoying music turn XA Sound OFF in SPU FIXES -sotu

**Chessmaster 3D** Works fine - dfg23 // Bin/Cue NOT WORKING, tried the usual correction combo's and nothing worked, gave up (v18) -sotu

**Chicken Run** IMG/CCD/SUB Works perfectly with standard bios settings to get the voices to sound their best I used XA Sound ON,

XA Speed Fix OFF, Reverb Simple, Interpolation Cubic, Sound Timer Method Original, play with it to see what sounds best for you (v18) -sotu

**Chocobo Racing** Works perfectly with default settings (v18) -ghaleon1103

**Chocobo s Magical Dungeon II** - (IMG/CUE/CCD/SUB) - Works perfectly with Standard BIOS Settings. I've personally played this one to the end without any problems. (v18) -ressurrectionx

**Chronicles of the Sword** - (BIN/CUE) - Graphics and video look good in Bios mode on regular settings. Weird audio glitch though that makes every line of dialogue you have in a conversation with somebody play at the same time right when you start talking. Haven't figured out a way to get this to stop happening yet. This renders the game virtually unplayable unless somebody comes up with a fix. (v18) -ressurrectionx

**Chrono Cross** - (IMG/CUE/CCD/SUB) - Works in BIOS. Music seems to skip just slightly. Not enough to turn CDDA off. The game seems perfectly playable after 15 minutes. (v18) -ressurrectionx

**Chrono Trigger** - (BIN/CUE) Works perfectly with Standard BIOS Settings. (v18) -ressurrectionx

**Circuit Breakers** works fine, sound issues (Isn't there always) and movies seem to crash the game but hammering start seems to get past that. -desertboy

**City of Lost Children, The** IMG/CCD/SUB Works perfectly with standard bios settings

**Civilization II** - (BIN/CUE) - Works perfectly with standard bios settings. (v18) -ressurrectionx]

Classic Games Intellivision

**Cleopatra Fortune** Bin/Cue Works perfectly with standard bios settings, intro sound is kinda off but in game seems fine (v18) -sotu

**Clock Tower I** - (BIN/CUE) - Works perfectly with standard BIOS settings. (v18) -ressurrectionx

**Clock Tower II: The Struggle Within** - (IMG/CCD/SUB) - Does not play right in BIOS mode with normal settings. Picture keeps flickering. Will freeze your Xbox in HLE mode. (v18) -ressurrectionx

**Codename: Tenka** IMG/CCD/SUB Tested, NOT WORKING Gets past several loading screens then Loads a screen that says Please Remove One of the Memory Cards, no idea how to do that. Help if you can (v18) -sotu

**Colin McRae Rally I** - (IMG/CCD/SUB) - Works with standard BIOS settings. Disable CDDA to get rid of loud buzzing sound. No music during the race or menu screens then. Gameplay seems tricky, but your car is meant to drift as part of the challenge, so it may be working as designed. May also run slower than designed, but playable. (v18) -ressurrectionx

**Colin McRae Rally II** - (IMG/CCD/SUB) Works with standard BIOS settings. Gameplay seems tricky, but your car is meant to drift as part of the challenge, so it may be working as designed. May also run slower than designed, but playable. (v18) -ressurrectionx

**Colin McRae Rally PAL** works ok, slightly choppy in Bios and HLE -lantus

**Colin McRae Rally 2 PAL** - Works fine in Bios mode (some slowdown), random lockups in HLE mode. -quicksilv

**College Slam** Bin/Cue Tested, NOT WORKING Loads up and starts the game credits, can't get into a game. Will continue testing later (v18) -sotu

**Colony Wars** IMG/CCD/SUB Works Perfectly with standard bios settings (v18) -sotu

**Colony Wars PAL** - Works in both HLE and Bios modes. In HLE, the sound is laggy, and the FMV is not played correctly. Bios has the same sound problem, but the fmvs are fine. -Kuis

**Colony Wars III: Red Sun** Bin/Cue Tested, NOT WORKING Goes directly to black screen and gets stuck there (v18) -sotu

**Colony Wars: Vengeance Game** loads up fine in both HLE and BIOS mode, however menu screen comes to a halt while sound is still playing, this is easily fixed when "Lazy screen updates" option is turned on. The games framerate drops to an unacceptably low speed as soon as games stages begin -mozee

**Command & Conquer** - (GDI Disk: IMG/CCD/SUB; NOD Disk: IMG/CCD/SUB) - Works with Standard BIOS settings. Audio on FMV sequences is out of sync with their lips, but still watchable. Game sequences play perfect. (v18) -ressurrectionx

**Command and Conquer: Red Alert** - (**Allies**: IMG/CCD/SUB; **Soviets**: IMG/CCD/SUB) - Works perfectly with standard BIOS settings. Audio on FMV sequences is out of sync with their lips, but still watchable. Watch the intro video at your own risk. Sometimes it locks up the Xbox mid-play. This only happened to me on the Soviet's disk, but it might happen on either. (v18) -ressurrectionx

**Command & Conquer: Red Alert** - Retaliation - (**Allies**: IMG/CCD/SUB; **Soviets**: IMG/CCD/SUB) - Works with Standard BIOS settings. Audio on FMV sequences is out of sync with their lips, but still watchable. Game sequences play perfect. (v18) -ressurrectionx

**Command & Conquer RA Retaliation PAL** works but Little Lag in HLE, Perfect 100% in BIOS -gigabad

**Contender** IMG/CCD/SUB Works perfectly with standard bios settings. Turn Disable CDDA ON in order to remove the buzzing sound (v18) -sotu

**Contender 2** IMG/CCD/SUB Works perfectly with standard bios settings (v18) -sotu

**Cotton JPN** Yes, (BIOS MODE) - Works Great -NeoCverA

**Contra: Legacy of War** - (BIN/CUE) - Game works perfectly with standard BIOS settings. Game does not freeze at character select screen in 2 player mode as previously stated. (v18) -ressurrectionx

**Contra Adventure** - (IMG/CCD/SUB) - Game starts with standard BIOS settings. No music. Turn off CDDA to stop screeching sound. There is a blank screen after you start the game where you can hear noise, but nothing happens. If you press start, the game will begin. Game plays pretty well until shortly after you defeat the first boss when there is a part where the floor is invisible and you can't tell where ground is and where the holes are. 2nd boss then is severley graphically glitchy. I didn't play past this part. (v18) -ressurrectionx

**Cool Boarders 2001** - (IMG/CCD/SUB) - Works with standard BIOS settings. Turn off CDDA to avoid screeching in some menu screens. Sound works on intro and during race and even in some of the menu screens. Seems to play very well. Freezes in HLE mode. (v18) -ressurrectionx

**Cool Boarders I: Extreme Snowboarding** - (BIN/CUE) - Works perfect with standard BIOS settings. I couldn't see any problems with speed. Sound is good. (v18) -ressurrectionx

**Cool Boarders II** - (BIN/CUE) - Works perfect with standard BIOS settings. Some minor audio glitches, but nothing serious. (v18) -ressurrectionx

**Cool Boarders III** - (BIN/CUE) - Works perfect with standard BIOS settings. Freezes in HLE mode. (v18) -ressurrectionx

**Cool Boarders IV** - (BIN/CUE) - Works perfect with standard BIOS settings. Neejoh mentioned this runs at only 80% speed, but it seems fine to me. (v18) -ressurrectionx

**Covert Ops: Nuclear Dawn** - (Disk 1: IMG/CUE/CCD/SUB; Disk 2: BIN/CUE) Works with standard BIOS settings. Speech isn't perfectly synched with the FMV sequences. Seems perfectly fine during play though. (v18) -ressurrectionx

**Countdown Vampires** IMG/CCD/SUB Works perfectly with standard bios settings (v18) -sotu

**Courier Crisis** Bin/Cue Works perfectly with standard bios settings (v18) -sotu

**Covert Ops Nuclear Dawn** Runs fine in both HLE and BIOS –Mars10

**Cowboy Bebop** Works on both Bios and HLE modes. Videos are slow in bios mode. spoken dialogue is slow in both modes - TymeRogue

Crash Bandicoot - Collectors Edition

**Crash Bandicoot I** - (IMG/CCD/SUB) - Works perfect with standard BIOS settings. Very minor frameskip and audio skip. (v18) -ressurrectionx

**Crash Bandicoot 2: Cortex Strikes Back** IMG/CUE Bios Mode, Frameskip Off. Works very well. 95% speed HLE mode will not load however (v18) -BrokenWing Mike

**Crash Bandicoot 2: Cortex Strikes Back (PAL)** Works at 99.99% in both modes! -!Idus\_beta

**Crash Bandicoot III: Warped** - (BIN/CUE) - Works with standard BIOS settings. Audio does not synch with video on the FMV sequences, but they are watchable. Gameplay more than satisfactory. (v18) -ressurrectionx

**Crash Bash** - (BIN/CUE) - Works perfect with standard BIOS settings. (v18) -ressurrectionx

**Crash Team Racing** Img/Ccd/Sub/Cue Runs well except your character disappears during the race, the wheels are visible but your character washes from time to time. Use Standard Bios Settings and turn on the CrashTeamRacing Fix in SPU Fixes (v18) -sotu

**Crazy Climber 2000** BIN/CUE Game runs perfectly with standard bios settings but controls don't seem to function properly. Will continue testing. FYI game weighs less than 100 megs (v18) -sotu

**Creatures** Bin/Cue Works perfectly with standard bios settings (v18) -sotu

**Creatures Raised in Space** IMG/CCD/SUB/CUE Works perfectly with standard bios settings (v18) -sotu

**Crime Killer** IMG/CCD/SUB/CUE Works perfectly with standard bios settings (v18) -sotu

**Critical Depth** works in BIOS mode. The music can get slow and/or choppy so it's best to disable CDDA. Once that is done the game runs great. -thraxen

**Criticom** IMG/CCD/SUB/CUE Tested, NOT WORKING will continue to test (v18) -sotu

**Croc I: Legend of the Gobbos** - (IMG/CCD/SUB) - Works with standard BIOS settings. Gameplay seems just a little slow. Intro movie glitches. (v18) -ressurrectionx

**Croc II** - (BIN/CUE) - Does not work with standard BIOS or HLE settings. Game "freezes" when you reach a scene on a beach with a chair under an umbrella. Nothing happens, but you can pause and bring up the options menu which won't do you any good. Does not freeze the Xbox though. (v18) -ressurrectionx

**Crossroad Crisis** Bin/Cue Works perfectly with standard bios settings (v18) -sotu

**Crow, The: City of Angels** IMG/CCD/SUB Works perfectly with standard bios settings (v18) -sotu

**Crusader No Remorse** IMG/CCD/SUB Works perfectly with standard bios settings. Frameskip OFF (v18) -sotu

**Crusaders of Might and Magic** - (BIN/CUE) - Runs too slow in BIOS mode. No way anybody would wait for those load times. (v18) -ressurrectionx

**Crypt Killer** IMG/CCD/SUB Works perfectly with standard bios settings, Frameskip OFF (v18) -sotu

**CUBIX Robots For Everyone** IMG/CCD/SUB Works perfectly with standard bios settings, Turn Disable CDDA ON in SPU FIXES (v18) -sotu

**Cyber Tiger Golf** IMG/CCD/SUB Tested, NOT WORKING will continue testing (v18) -sotu

**Cyberia** IMG/CCD/SUB Intro FMV sound is poor but in game is fine. Works well with standard bios settings (v18) -sotu

**Cyber Sled** IMG/CCD/SUB/CUE Works perfectly with standard bios settings (v18) -sotu

**Cyber Speed** Bin/Cue Works perfectly with standard bios settings (v18) -sotu

**D** - (3 Disks - ALL: IMG/CUE/CCD/SUB) - This game plays REALLY slow and but there is no sound effects or voices, just ambient background. Game constantly freezes, though the ambient noise keeps playing. (v18) -ressurrectionx

**Dance Dance Revolution 3rd Mix JPN** only works in BIOS – angelfly

**Dance Dance Revolution 5th Mix JPN** No, Hangs on Loading Screen – Azatotht

**Dance Dance Revolution Disney Mix** Hangs on loading in both HLE and BIOS modes -stealthy

**Dance Dance Revolution Konamix** freezes on the konami logo for both hle and bios for me!

**Dance Dance Revolution** Yes, a bit slow in HLE and BIOS, FMV Skips- Azatotht / Steps off-beat - DefaultGen

**Dance Dance Revolution: Party Edition (PAL)**: doesnt load past the screen that tells u not to hurt yourself???? -!Idus\_beta

**Danger Girl** - (IMG/CCD/SUB) - Works with very minor sound delay in standard BIOS mode. The night vision goggles do work. The screen turns white on you when you are near a light. This is not a glitch. Gameplay seems pretty smooth, but may not be 100%. (v18) -ressurrectionx

Dare Devil Derby 3D

**Dark Forces PAL & NTSC:** Works fine BIOS. Very minor glitches. Turn on dark forces fix -big\_xbox\_n00bie / (v18 NTSC) -XDelusion

**Dark Stone BIOS** -cdes

Darklight Conflict

**Darkstalkers I** - Game works with Standard BIOS settings. Audio is very choppy in the intro and less choppy in the menus. Seems fine during gameplay though. The game itself allows 3 speed settings and they are all playable. (v18) -ressurrectionx

**Darkstalkers III** - (BIN/CUE) - Works Perfect with Standard BIOS settings. Only glitch I've seen is the game slowing down a bit when the Sasquach uses one of his graphic intensive attacks. (v18) -ressurrectionx

**Dave Mirra Freestyle BMX Maximum Remix** - Works 100% but plays slow. -XenShocker

**Dave Mirra Freestyle BMX** Yes, but only in BIOS, freezes in HLE

**David Beckham Soccer** works @ 95% everythings gr8 EXCEPT, character formation screen has funky shiny htngs behind the chars name (when it shouldnt) and slight graphical errors before game, while playing/in-game - its fine - with both BIOS & HLE - t!dus\_beta

Dead Ball Zone

Dead in the Water

**Dead or Alive** - In HLE mode, it locks up after selecting a character but it plays great in BIOS mode but has static during character selection and during gameplay so cdda must be turned off -prican24

**Dead or Alive PAL** - Yes, Works with BIOS mode, a nogo on HLE. Not sure which frameskip settings suit this best - it either runs too jerky or too slow, and the frameskip=on + old frameskip on workaround doesn't do the trick for this game - Dante\_Ali.

**Death Trap Dungeon** - Doesn't boot in hle, crashes after character select in bios. -gamemaster14

**Deception III: Dark Delusion** - (IMG/CCD/SUB) - Works great with Standard BIOS settings. If there is supposed to be audio in the FMV, there isn't. Game can get a little slow when certain larger traps are sprung, but otherwise this game appears to be fully playable. (v18) -ressurrectionx

Defcon 5 Peace Has a Price

**Delta Force Urban Warfare (PAL-E) [SLES-03890]** (CCD/IMG/SUB) - Works with default bios settings but is very choppy, supports Dualshock analogue controls (v18) -Retroplay

Demolition Racer

**Descent Maximum** - (IMG/CCD/SUB) - Works Perfect with Standard BIOS settings. FMV looks great. (v18) -ressurrectionx

**Descent** - (IMG/CCD/SUB) - Does not work. Freezes at "Loading" screen after first FMV of a new game in both BIOS and HLE modes. Only used default settings though so there may be a fix. Use Decent Maximum as it plays perfectly. (v18) -ressurrectionx

**Descent 2** works with some minor glitches and sound sync issues -rockade

**Destrega** - (IMG/CCD/SUB) - Works Perfect with Standard BIOS settings. FMV looks good and played several rounds and everything plays good. (v18) -ressurrectionx

**Destruction Derby 2** No, crashes after track loads - jammi

**Destruction Derby Raw** Works using the bios.. video lags very slightly, but audio is good. -Cirial

**Destruction Derby** works fine in HLE- old frameskip & framelimit ON, everything else OFF. Wait 2-3 minutes for the game to load up. pausing and unpausing gives a buzzing noise until you exit the race -deathx88 / I was able to play a race, but once it tried to load back to the menu at the end of the race it locked up. Then I re-loaded the game and played an actual destruction derby. It played fine but then it locked up while I was looking at the point standings after the derby - Thraxen

**Detana Twinbee Yahoo! Deluxe (J)**IMG/CCD/SUB Shump Runs perfectly with standard bios settings (v18) -sotu

Detective Barbie: The Mystery Cruise

**Devil Dice** No, doesn't boot in either mode -Laslo

**Dexters Laboratory Mandarks Lab** Bios/HLE works perfectly beside a few sound problems. -skaboi

**Dezaemon (J)** MDF/MDS Works perfectly with standard bios settings, Frameskip ON, Framelimit OFF, Disable CDDA ON, Sound Timer Method ORIGINAL. Collection of 10 JPN SHUMPS all in one game (v18) -sotu

**Diablo** Bin/Cue Runs very well with Standard Bios Settings, Sound Timer Method set to ORIGINAL (v18) -sotu

**Diablo PAL** works in bios with all standard settings perfectly -vintage guitar

Diabolical Adventure of Tobu

**Die Hard Trilogy** - In both modes it freezes the xbox right after the probe logo -prican24

Die Hard Trilogy 2

**Digimon: Digital Card Battle** - Works Perfectly with Standard BIOS settings. (v18) -ressurrectionx

**Digimon Rumble Arena** Didn't Load with HLE, No Video with BIOS just Sound

**Digimon World I** - (IMG/CCD/SUB) - Works Perfectly with Standard BIOS settings. (v18) -ressurrectionx

**Digimon World II** - (IMG/CCD/SUB) - Works with standard BIOS settings. Some graphical glitches but seems to be fully playable. (v18) -ressurrectionx

**Digimon World 3** works well with default settings. The battles are a bit laggy. Didn't tweak the settings, so maybe it could work better. It's good enough for me, though -kokenjr

**Dino Crisis** tested in v13 w/BIOS. Intro is playable but the sound doesnt synch up with the video. When the actual game starts (you controlling character), spoken dialog is perfect. When you pause the game, the screen is jerky - starts jumping up & down a bit. - Jagull

**Dino Crisis 2** IMG/CUE Old Frameskip On, Frameskip Off, Lazy Screen Updates On. Game runs Full Speed, an occasional stutter in the voice occurs once in a while, but it's small and doesn't take away from the game any (v18) -BrokenWing mike

**Discworld** Works perfect in Bios, default settings (v18) -Mandoz

**Discworld II: Mortality Bytes** - (IMG/CUE/CCD/SUB) - Works with Standard BIOS settings with some graphical glitches. Title screen is blank and some layering gets pretty glitchy in the game. Perfectly playable though. (v18) -ressurrectionx

**Disney World Quest Magical Racing Tour** IMG/CCD/SUB Runs almost perfect with standard bios settings, Turn Frameskip & Framelimit OFF, Turn Disable CDDA ON, Sound Timer Method Original (v18) -sotu

**Disney's Aladdin - Nasira's Revenge** BIN/CUE Runs perfectly with standard bios settings turn Frameskip and Framelimit OFF (v18) -sotu

**Disney's Atlantis the Lost Empire** BIN/CUE Runs almost perfect with standard bios settings, Turn Frameskip & Framelimit OFF, Turn Disable CDDA ON, Sound Timer Method Original (v18) -sotu

**Disney's Dinosaur** IMG/CCD/SUB Runs almost perfect with standard bios settings, Turn Frameskip & Framelimit OFF, Sound Timer Method Original (v18) -sotu

**Disney's Goofey's Funhouse** IMG/CCD/SUB Runs almost perfect with standard bios settings, Turn Frameskip & Framelimit OFF, Sound Timer Method Original (v18) -sotu

**Disney's Lilo & Stitch** IMG/CCD/SUB Runs almost perfect with standard bios settings, Turn Frameskip & Framelimit OFF, Sound Timer Method Original (v18) -sotu

**Disney's Tarzan** IMG/CCD/SUB Runs almost perfect with standard bios settings, Turn Frameskip & Framelimit OFF, Sound Timer Method Original (v18) -sotu

**Disney: The Little Mermaid** - (IMG/CCD/SUB) - Works Perfectly with Standard BIOS settings. (v18) -ressurrectionx

**Disney's The Lion King Simba's Mighty Adventure** IMG/CCD/SUB Not Working, Gets stuck at Loading Screen (v18) -sotu

**Disney's Toy Story 2 - Buzz Lightyear** BIN/CUE Runs well with standard bios settings turn Framelimit OFF, Sound Timer Method Original. Some of Buzz's textures are too dark but otherwise looks and runs great (v18) -sotu

**Disruptor (PAL)** During the few fmv sequences video is not sized properly and audio is out of sync, but the game plays fine in bios or hle mode, with default settings (v18) -Chronic Mitosis

**Diver's Dream (PAL-E) [SLES-01535]** (BIN/CUE) - Works fine with default bios settings, slight audio skipping during FMV (v18) -Retroplay

Divide Enemies Within - The

Donald Duck Goin' Quackers

**Dodonpachi (J)** CDI - didn't work; Bin/cue it worked up to the last Please Wait screen after choosing your ship (v18) -sotu

**Donpachi** No, Crashes in HLE mode after first logo. LOTS of slowdown in bios mode, ==> works but totally unplayable - sunseeker

**Doom** HLE mode locks up after willams intro while BIOS mode stops at the loading screen -prican24

**Doom PAL**No, Dosen't work - Dante\_Ali

Dracula The Last Sanctuary

Dracula The Resurrection

**Dracula X** Lots of skips (could be my xbox hd dyeing), but otherwise near perfect. -blitz6

**Dragon Ball GT Final Bout** works fine in bios, its a bit slow 90% -deathx88 // Confirmed in v18 -Lempt

**Dragon Ball Z Legends** - Works in Bios mode. enable lazy screen updates \*V2\* full speed and sound. -thechoseneone

**Dragonball Z: Ultimate Battle 22** Yes, works 100%, movies look like crap (blocky) might just be the game -lethial

**Dragon Seeds** Bin/Cue Works Perfectly w/ Standard Bios Settings, Sound Timer Method set to ORIGINAL (v18) -sotu

Dragon Tales DragonSeek

**Dragon Valor** IMG/CCD/SUB Runs perfectly with standard bios settings (v18) -sotu

**Dragon Warrior 7** Bin/Cue, BIOS Mode, 1.4 Core, GPU 1.16, SPU, 1.6, Set SPU Fixes>XA Sound: ON, Reverb:Best, Interpolation:None, Sound Timer Method: Original - The menu stopped blinking. Just go to new game, put a name and your set. I haven't seen issues, but ill mess around (v18) -amak1131

Dragonheart Fire and Steel

**Driver I: You Are The Wheelman** - (IMG/CUE/CCD/SUB) - Works with Standard BIOS settings. Game froze up on me when I lost the first underground parking garage tests. (v18) -ressurrectionx

**Driver II - The Wheel Man Is Back** - (BIN/CUE) Locks up when you press start to get to the main menu in both BIOS and HLE modes. Unplayable with stanard settings on either mode. (v18) -ressurrectionx

**Driver 2 The Wheel Man Is Back PAL** - I would say about 50% playable in HLE and around 80% in BIOS - ORANGEY

Ducati World Racing Challenge

**Duke Nukem Land of the Babes** Works in both modes but runs sluggish during gameplay -prican24

**Duke Nukem Time To Kill** Works perfectly in BIOS mode (v18) -Liquidvlade Hiraduo

**Duke Nukem Time To Kill PAL** Yes, works ok, slightly choppy in Bios/HLE

**Duke Nukem Total Meltdown** works fine in bios and HLE. Everything OFF, still alittle choppy, some music doesn't work or is real slow, if you fire the shotgun all the sound is gone, textures are screwed up on floors and ceilings that are slanted or slopes - deathx88

Dukes of Hazzard II: Daisy Dukes It Out

Dukes of Hazzard: Racing For Home

**Dune 2000** Yes, a few glitches here and there but otherwise works pretty good- krackheadbill

Dynasty Warriors

**E.T. Interplanetary Mission** IMG/CCD/SUB Works perfectly with standard bios settings, Frameskip OFF & Turn Disable CDDA ON in CPU FIXES (v18) -sotu

**Eagle One Harrier Attack** Works in Bios mode only, sound glitches w/ in-game video. -M@gnus

**Earthworm Jim 2** Bios/HLE - gameplay is fine, disable CDDA to get rid of the noise when you unpause the game -deathx88  
Earthworm Jim 3D  
**Echo Night** - (IMG/CCD/SUB) - Works Perfect with Standard BIOS settings. (v18) -ressurrectionx  
**ECW Anarchy Rulz** - (IMG/CCD/SUB) - Works with standard BIOS settings. FMV sequences are choppy, but the audio doesn't skip. I have a hard time believing this game didn't have music during the matches or the wrestler intros. If it didn't, gameplay is 100%. (v18) -ressurrectionx  
**ECW Hardcore Revolution** - (IMG/CCD/SUB) - Works with standard BIOS settings. I have a hard time believing this game didn't have music during the matches or the wrestler intros. If it didn't, gameplay is 100%. (v18) -ressurrectionx  
**Eggs of Steel** IMG/CCD/SUB Does Not Work, tried several combos and could only get past the intro splash screens, froze before game started (v18) -sotu  
**Ehrgeiz** - (BIN/CUE) - Works with Standard BIOS settings. FMV intro looks great. Game plays fast, but refresh rate is poor. Sound seems good. (v18) -ressurrectionx  
**Einhandler** Img/Ccd/Sub/Cue Works Perfectly w/ Standard Bios Settings (v18) -sotu  
**Elemental Gearbolt** Yes, works in both HLE/BIOS, but is a little slow in both (though not so slow as to be unplayable) + choppy sound during some cutscenes – AgentofEvil  
Eliminator  
Elmo's Letter Adventure  
Elmo's Number Journey  
Emperors New Groove - The  
Epidemic  
**ESPN Extreme Games** - its playable but not full speed at most times also when in the catalog some text is missing -prican24  
ESPN Major League Soccer Game Night  
ESPN Xgames Pro Boarder  
**Eternal Eyes** BIOS works fine -vegitto  
**Evil Dead Hail to the King** - (Both Disks: IMG/CCD/SUB) - Works perfect with Standard BIOS settings. (v18) -ressurrectionx  
**Evil Zone** Bin/Cue Runs perfectly with standard bios settings, turn Frameskip & Framelimit OFF for best in game fighting performance. Good game! (v18) -sotu  
Excaliber 2555 AD  
**Expendable** HLE: Crash, Bios:Good ~Sound Good. Graphics Good. (Cool!)-NeoCverA  
Extreme Go Kart Racing[/b] - Works with standard BIOS settings. Game runs a little slow, but not so slow that it is unplayable. Switching to old frameskipping seems to make it better. Music skips slightly on intro and menu screens. Annoying buzzing during race is actually the go kart noise. Disabling CDDA will not get rid of the noise. Not sure if the emulation on it is bad or it was programmed to be that annoying originally. (v18) -ressurrectionx  
**Extreme Pinball** - Does not work in either BIOS or HLE modes with standard settings. Also tried switching to old frameskipping and turning the frameskip and frame limit off with no luck. Strange thing is that when a table finally does load up, it seems the only way to get the game to move is if you're holding down the throttle button the whole time. But then it plays too fast. Unplayable unless somebody comes up with a fix. (v18) -ressurrectionx  
Extreme Roller  
F1 2000  
F1 Championship Season 2000  
F1 World Gran Prix 1999  
**F1 World Gran Prix 2000** Yes, some graphics problems during Gameplay –dbvirto  
**Fade To Black (NTSC/U)** Works fine with default settings, audio in movies can skip a little but nothing serious (v18) -Retroplay  
**Fade to Black PAL** works very well. You have to turn on the frame limit to get the right speed, the cinema scenes have somewhat choppy audio and the game hangs on loading screens on occasion, but the actual graphics and gameplay are excellent. -yodanut  
Family Feud  
Family Game Pack 2001  
**Fantastic Four** (IMG) Works fine, sound is awful though (v18) -MysteryMan2K8  
**Fatal Fury: Wild Ambition** Yes, works 100% - jammi // BIN/CUE Game works fine through the first round but then you lose control of your character in round 2, joystick unresponsive. Need someone to test this game and post how far you got and if you had any controller malfunction. I can still use the controller to exit out of the game so the problem isn't my xbox controller (v18). -sotu  
**Fear Effect I** - (All Disks: BIN/CUE) - Works perfect with standard BIOS settings. (v18) -ressurrectionx  
**Fear Effect II: Retro Helix** - (Disks 1,3,4 IMG/CCD/SUB; Disk 2: BIN/CUE) Works perfect with Standard BIOS settings (v18) -ressurrectionx  
**Felony 11-79** Works perfectly with default settings. Tested on v18 -barman1176  
FIFA RTWC 98  
**FIFA Soccer 2000** BIN/CUE (CdrWin) works a bit slow but good on BIOS mode. Old frame skipping + Lazy screen updates for better speed (v18) -Lempt  
FIFA Soccer 2001  
FIFA Soccer 2002  
FIFA Soccer 96  
FIFA Soccer 97

**FIFA Soccer 99** - YES - HSDMONZ

FIFA World Cup 2002

**Fifth Element – The** Yes, BIOS ONLY with settings changes perfect –senator

Fighter Maker

Fighting Force 2

**Fighting Force** - No

**Final Doom** No, locks up at loading screen (included some of the master levels not to mention a variation of TNT and Plutonia missions)

**Final Fantasy Origins** - Both games in it work perfect - BIOS -big\_xbox\_n00bie

**Final Fantasy IX** - Works in Bios mode. Turn off frameskip./ crashes at the airship FMV -stezo2k

**Final Fantasy IX PAL** - Works in Bios mode. turn all options except frame skip off. -shp0ngle

**Final Fantasy IV** Works - wrong colors. (HLE & BIOS) - Dante\_Ali // Confirmed in v18 -BrokenWing Mike

**Final Fantasy Tactics** - works 100% load and save work too. old frameskip, framelimit, parasite eve/vandel heart fix all ON, everything else OFF. Tested with v11 with scph1001 bios, xbox bios x2 4983 -diontae18

**Final Fantasy V** only real issue is making sure to not hold throttle going into battles or you won't have any text in the menu boxes, didn't try much to fix it, so there may be a workaround even. There may have been some graphical glitches outside of that, but nothing major. -SeaLlama

**Final Fantasy VI** Works perfect - BIOS -big\_xbox\_n00bie // Old Frameskip On, Frameskip Off, Sound Timer Method - Original Gets rid of menus flickering and reduces the annoyance of the sound when you move the cursor in menus (v18) -BrokenWing Mike

**Final Fantasy VII** - Bios, everything OFF except framelimit and old frameskip, unmap throttle too. Your choice to turn lazy screen updates ON or OFF. Both have different effects its best to see which one you like better. Everything else seems to run pretty good -deathx88

**Final Fantasy VII PAL** - Works until when you get in the lab and you get caught and put in jail. -kevinlekiller

**Final Fantasy VIII** - Yes , Slight skipping on movies, game slows down as transition from dark to light or vice versa (with slight skipping), game locks up in battle on hle mode, on bios mode no battle menus.. - azninvacion / In FFVIII the battle menu can be easily fixed, turn frameskip OFF, old frameskip ON, lazy screen updates ON, and unmap the throttle as well -mozee

**Final Fantasy VIII PAL** Works, set filter to none, disable frameskip and enable old frameskip. You need to have your ISO patched first, else the copy protection will stop the game from playing! -horscht

**Fire Pro Wrestling G** Yes, works perfect (BIOS and HLE) –sighting

**Firepro Wrestling G (J)** - Intro music rarely skippy, story mode sounds skip a little. Perfectly playable. 97% (Frameskip, Framelimit) -darkstalker

Firemen 2, The (*NTSC-J*) [*SLPS-00148*][*/b*] BIN/CUE - Works fine with default bios settings, except that ingame speech doesn't work no matter what settings you change (v18) -Retroplay

Firo and Clawd

Fishermans Bait

**Flintstones Bedrock Bowling** - Yes works fine - alikaz

Floating Runner

Ford Racing

Formula 1 2000

Formula 1 98

Formula 1 World Championship Edition

Formula 1

Formula One 99

**Forsaken** Runs ok with default graphic fix settings. No skipping at all in opening FMV. Better off to disable CDDA entirely when playing this game, as sound skips like crazy and tends to be distracting. Disable throttle, as well as change save state slot, and graphic filter hotkeys to play in DualShock. Tested on v18. -barman1176

Fox Hunt

Fox Sports Golf 99

Fox Sports NHL Championship 2000

Fox Sports Soccer 99

Freestyle Boardin 99

Freestyle MotoCross McGrath Vs. Pastrana

**Frogger IMG/CCD/SUB** Runs perfectly with standard bios settings (v18) -sotu

**Frogger 2: Swampy's Revenge** ISO Runs perfectly with standard bios settings (v18) -sotu

**Front Mission 3** Works in HLE mode, there is some skips in gameplay. Freezes 10 minutes into game when in Bios mode. -Synthetic

**Frontschweine** Works in Bios mode -Jerico

**Future Cop L.A.P.D.** - (BIN/CUE) NO. Audio skips so bad you hear double with standard BIOS or HLE settings. Freezes when you get to a screen where it says "press start or x to skip video. (v18) -ressurrectionx

**G Darius (J)** - (BIN/CUE) - Works with Standard BIOS settings. Too choppy at some points to play though. I didn't test any other settings on this game. (v18) -ressurrectionx

**G-Police I** - (Both Disks: BIN/CUE) - Works with Standard BIOS settings. Choppy animation. I did not try any alternate graphics settings. (v18) -ressurrectionx

**G Police 2 Weapons of Justice** BIOS - turn off CDDA and XA processing - has some ghosting issues -cdes

**Gaiaseed (J)** SHUMP BIN/CUE Works perfectly with standard bios settings. Turn Frameskip OFF (v18) -sotu

**Galaga - Destination Earth (NTSC-U) [SLUS-01258]** (BIN/CUE) - Frameskip OFF/Old frameskip ON, everything else just default bios settings (v18) -Retroplay // Disable CDDA audio to remove screeching sound (v18) -ressurrectionx

**Galerians** Yes, Turn off Frame rate and you got an almost PERFECT working bin!!! -xboxed

**Galaxian 3** Yes, requires BIOS mode, slightly choppy during FMV, but otherwise works perfectly. -Dahak

**Gallop Racer** - works but it seems rather choopy in the menu and when it hits the racing part it is very choppy, almost impossible to play. - socrates

**Game of Life – The** Yes, Boots fine but extremelly laggy and skipping sound. Test both HLE and bios modes. Both produce the same result -Instinct

**Gauntlet Legends** - (IMG/CUE/CCD) - Use HLE mode. Standard settings. It takes a long time to load anything but it's much worse in BIOS. Works with standard BIOS settings. Takes forever to load whenever the loading screen comes up. Virtually unplayable because of this with standard BIOS settings. I've heard that this game originally gained noteriety for it's insane loading times, so it probably plays at near 100% in HLE mode. Don't forget to use that throttle. (v18) -ressurrectionx

**Gekido** Yes, Runs perfect apart from no music and is slower using bios. -spaceboy

Geom Cube

**Gex I** - (BIN/CUE) - IMG/CCD/CUE/SUB Was used by -suto - Works perfectly with standard BIOS settings. I can't figure out what the "Run" button is. It doesn't seem to work. I played the first level and the FMV in the beginning works great. (v18) -ressurrectionx

**GEX II: Enter The Gecko** - (IMG/CCD/SUB) - Works in BIOS mode with "Old Frame Skipping" Turned "ON". I can't figure out what the "Run" button is. Seems to be a bit jerky, but the PSX may have been that way back in the day on the 3D games. FMV looks great. I played through the first level on this game. (v18) -ressurrectionx

**GEX III: Deep Cover Gecko** - (IMG/CCD/SUB) - Works in BIOS mode with "Old Frame Skipping" Turned "ON". I can't figure out what the "Run" button is on this one either. Seems to be a bit jerky, but the PSX may have been that way back in the day on the 3D games. FMV looks great. Played through the training level. (v18) -ressurrectionx

**Ghost In The Shell** - (BIN/CUE) - Works in BIOS mode sort of. Video sequence cartoons look great. Menu flashes repeatedly to black and back. Gameplay is the same. Screen keeps flashing as if you were at two different spots at once. Tried the Inuyasha fix, and also old frameskipping with lazy screen updates. Does not fix the problem. Doesn't work at all in HLE mode. (v18) -ressurrectionx

**Ghost in the Shell (J)** Definitely playable when you set core version to 14 and make sure framelimit and old frame skipping are on, the rest off. CDDA is a bit choppy, but bearable. 85%. Tested on v18 -barman1176

Glover

Goal Storm 97

Golden Nugget Casino

Golden Tee Golf - Peter Jacobsen's

**Gradius Deluxe Pack** IMG/CCD/SUB/CUE Both Gradius 1 & 2; Runs perfectly with standard bios settings (v18) -sotu

**Gradius Gaiden J/NTSC** Works great in Bios mode; HLE mode it shows a gfx error once in a while but plays fine -prican24

**Gran Turismo I** - (IMG/CCD/SUB) - Works perfect in BIOS mode with Frameskip: Off, Old Frameskipping: On, Lazy Screen Updates: On and Reverb: None/Fastest. FMV looks great. Played two races. Controls seem a little touchy, but then again, I've never been good at driving games. (v18) -ressurrectionx

**Gran Turismo II** - (Arcade Disk: IMG/CUE/CCD/SUB; Simulation Disk: IMG/CCD/SUB) - Plays way too slow to be enjoyable in BIOS mode. I even tried to turn frameskipping off, frame limit off, old frameskipping on, lazy screen updates on and Reverb: None/Fastest. These definately made the game faster, but it's still way too slow. Game freezes up before race in HLE mode. (v18) -ressurrectionx

**Gran Turismo PAL** - its ok, but its strange this one. ingame its slightly slower than in should be, and car is awfully sensative to the dpad! -t!dus\_beta

Grand Slam 97

Grand Theft Auto Directors Cut

**Grand Theft Auto London 1969 (No CD Swap)** Works well in both BIOS/HLE mode but theres static for music so CDDA must be disabled and in HLE i couldn't see the swap disc text but pressing x still loaded the game fine -prican24

**Grand Theft Auto London Mission Pack** No, Can't Swap DISC -desertboy

**Grand Theft Auto 2** In HLE mode, it stops at the piracy screen but the game loads fine in BIOS mode but the game doesn't play at 100% as without the old frameskip enabled it will start getting choppy in parts with a lot of action -prican24

**Grand Theft Auto 2 (E)** - Works perfectly except for the fact that the radio stations constantly play and there's no way to stop them, even on foot. Turning down the music volume in-game simply does not work. Perfectly playable, though I'd recommend some button remapping. 95% (Frameskip, Framelimit) -darkstalker

**Grand Theft Auto** Yes, Works in HLE mode, no music. If you don't feel like remapping the R trigger, just pull on it half way (doesn't skip, i think this applies to any game using the R trigger in general). -rq8182

Grand Tour Racing 98

**Grandia** - IMG/CCD/SUB Works perfectly with standard settings (v18) -sotu // IMG/CUE BIOS Mode, Old Frameskip On, Lazy Screen Updates On, Frameskip Off. This will get rid of voice delays, at least it did for me. Game plays near perfect, 97% speed (v18) -BrokenWing Mike

**Granstream Saga** IMG/CCD/SUB Works Perfectly with standard bios settings (v18) -sotu

Great Valley Racing Adventure - The

Gretzky 3D Hockey

Grid Runner

Grinch - The

Grind Session

Grudge Warriors

Guardians Crusade - (IMG/CUE/CCD/SUB) - Works Perfectly with standard BIOS settings. Minor graphical glitch makes screen flash every once and a while. Perfectly playable though. (v18) - resurrectionx

Guilty Gear - (IMG/CCD/SUB) - Works perfectly with standard BIOS settings. (v18) - resurrectionx

**Guitar Freaks (J)** - Intro stops and akips right when it reaches the title screen after the video itself is done playing. Music at selection screen slightly skippy. Seems to stay perfectly in sync on the songs I've tried. Unsure if disc change option works, I don't have the append disc. Perfectly playable with the right controller configuration. Disable CDDA needed, unless you enjoy having your ears blown out as soon as you start the game. Don't worry, the game doesn't actually USE CDDA to begin with. 95% (Frameskip, Framelimit, Disable CDDA) -darkstalkers

Gunbird (J) [B]BIN/CUE Works flawlessly with standard bios settings, Frameskip OFF, turn Disable CDD ON to get rid of buzzing after continue (v18) -sotu

Gun Fighter The Legend Of Jesse James

Gundam Battle Assault - (BIN/CUE) - Works perfectly with standard BIOS settings. Seems like it may be a little slow. (v18) - resurrectionx

**Gundam Battle Assault 2** Doesn't work in Bios, works fine in HLE. Turn on InuyashaSengokuBattle CPU Fix. 95% -kokenjr

**Gunners Heaven (J)** - Doesn't appear to be any music in the middle of playing, but I'm unsure if that's intended or not. Seems to otherwise run perfectly. 99% (Lazy screen updates, Old Frameskipping, Framelimit) -darkstalker

**Gunpey JPN** works perfect in Bios/HLE, default settings -deathx88

Gunship 2000

Hardball 99

**Harmful Park** - Works in Bios mode. No problems. -VERBALKENT

**Harmful Park (J)** - Goofy side-scrolling shooter in the Parodius vein. Works perfectly. 100% (Lazy screen updates, old frameskip, framelimit) -darkstalker

**Harry Potter and the Sorcerer's Stone** Yes, but only with BIOS -moneyshtz

**Harvest Moon: Back To Nature** Works 100% fine in Bios mode -boo\_se

HBO Boxing

Heart of Darkness - (2 Disks - Both: BIN/CUE) - Works perfectly with standard BIOS settings. Very cool game. (v18) -resurrectionx

Hellboy: Asylum Seeker - (BIN/CUE) - Works with standard BIOS settings. Title screen and start menu is black. I don't know how to get them to show up. FMV sequences look good. Game seems to play fine though once you start it. (v18) -resurrectionx

Hello Kittys Cube Frenzy

Herc's Adventures - (BIN/CUE) - Works Perfectly with standard BIOS settings. (v18) -resurrectionx

Hercules

Hexen - (IMG/CUE/CCD/SUB) - Works perfectly with standard BIOS settings. Frameskip: Off, Old Frameskip: On, Lazy Screen Updates: On. (v18) -resurrectionx

Hive - (2 Disks - Both: IMG/CCD/SUB) - Works perfectly with standard BIOS settings. Frameskip: Off, Old Frameskip: On, Lazy Screen Updates: On. Just some very minor skipping during play. (v18) -resurrectionx

**Hogs of War** BIN/CUE Works perfectly with standard bios settings (v18) -sotu

**HOKUTO NO KEN (J)** works juste nice ^\_\_^ Bios SCPH1001 v13 -poulpyx

Hooters Road Trip - (IMG/CCD/SUB) - Works perfectly with standard BIOS settings. Frameskip: Off, Old Frameskip: On, Lazy Screen

Updates: On. Racing may be a little slow, but it's definatley playable. Girls look great 😊 (v18) -resurrectionx

**HOSHIGAMI Ruining Blue Earth** Yes, BIOS - Works fine, HLE - Freezes -IceWolfX

Hot Shots Golf I - (BIN/CUE) - Works perfectly with standard BIOS settings. (v18) -resurrectionx

Hot Shots Golf II - (IMG/CCD/SUB) - Works perfectly with standard BIOS settings. (v18) -resurrectionx

Hot Wheels: Extreme XTR Racing - (IMG/CUE/CCD/SUB) - Works Perfect with Standard BIOS settings. (v18) -resurrectionx

Hot Wheels Turbo Racing

Hugo: The Evil Mirror - (BIN/CUE) - Game works fine on both BIOS and HLE mode. Only problem is there is some major graphical glitches with the enemies. Sometimes they disappear. Game is probably playable, but there are similar games that can be played without a problem. Should probably just skip it. (v18) -resurrectionx

**Hydro Thunder** plays in both Bios and HLE but has some slowdown and the audio glitches -DaGamePimp

ID4 Independence Day

**IHRA Drag Racing** works fine, a little choppy, but good -frylock

Impact Racing

**In Cold Blood** - (2 Disks - Both: BIN/CUE) - Works perfect with standard BIOS settings. (v18) -resurrectionx

In The Hunt

**Incredible Crisis** - (IMG/CCD/SUB) - Works perfect with standard BIOS settings. (v18) -resurrectionx

Incredible Hulk - The Pantheon Saga

**Initial D** doesnt work with HLE, doesnt work with BIOS either - moneyshtz

**Inuyasha: Sengoku Battle** - (IMG/CCD/SUB) - Runs with standard BIOS settings and standard HLE settings, but get's stuck in the first mission where you are to destroy a boulder in 30 seconds. Weird audio glitch followed by the inability to attack and the counter never starts counting down. Japanese voices in background continue to talk the entire time. (v18) -ressurrectionx

Inspector Gadget: Gadgets Crazy Maze

**Intelligent Qube** - (IMG/CUE/CCD/SUB) - Works perfect with standard BIOS settings. During the 7th level, the game starts acting funny and your character will freeze or move uncontrollably in one direction. Because of this, I have been unable to beat the 7th level. Pretty sure this is a glitch with the emu as I don't think there is anything that I'm doing that would make the game behave that way. (v18) -ressurrectionx

Intellivision Classics Games

**Internal Section (J)** Works great with default settings. Gets a bit laggy if you use the "dragon" weapon and screen is full of enemies. Decent framerate. Tested on v18 -barman1176

International Moto X

International Superstar Soccer Pro 98

**International Superstar Soccer 2000** BIN/CUE (CDRWin) run a bit faster than usual, but you can make it run slightly slower if frameskip is disabled and framelimit is enabled (v18) -Lempt

International Superstar Soccer Pro Revolution

**International Superstar Soccer Pro Evolution 2** Yes, Yes Works as long as "Old Frameskipping" in enabled and the throttle button is unmapped from RTrigger. 82ross

**International Track & Field 2000** (BIN/CUE) Loads up to the event selection screen. No video + hangs up after that on both BIOS and HLE modes (v18) -Lempt

**International Track and Field** Doesnt work in Either Mode -dfg23

Interplay Sports Baseball 2000

**Invasion From Beyond** - (IMG/CCD/SUB) - Works with standard BIOS settings. Turn off CDDA to get rid of the screaming noise. (v18) -ressurrectionx

Iron & Blood Warriors of Ravenloft

**Iron Soldier III** - (BIN/CUE) - Works perfect with standard BIOS settings. (v18) -ressurrectionx

**IronMan XO Manowar In Heavy Metal** BIN/CUE Works perfectly with standard bios settings (v18) -sotu

**Irritating Stick** - (IMG/CCD/SUB) - Works perfect with standard BIOS settings. (v18) -ressurrectionx

ISS Pro Evolution

**ISS Pro Evolution 2** No - fxbenshi

**Italian Job - The** HLE and BIOS: Menus and Menu music slightly slow. Videos run fine. After Menu, system freezes on game load screen. -Deltronik

**Jackie Chan Stunt Master** Works perfectly in Bios mode. -gamemaster14

**Jade Cocoon** Works with core 1.4, gpu 1.12, and spu 1.16 (v18) -ghaleon1103

**Jade Cocoon Story of Tamamayu** BIN/CUE Works perfectly with standard bios settings. In-Game save did not work due to memory card issue but Save State seems to work fine, transparent effects are show as opaque (v19) -X\_Splinter

Jampack Demos 2000

Jarrett & Labonte Stock Car Racing

Jeff Gordon XS Racing

Jeopardy

Jeopardy! 2nd Edition

Jeremy McGrath Supercross 2000

Jeremy McGrath Supercross 98

**Jersey Devil** - (BIN/CUE) - Works near perfect with standard BIOS settings. Music skips a little bit but it's not enough to turn the CDDA off. Game perfectly playable otherwise. (v18) -ressurrectionx

**Jet Moto** Works in HLE mode, but controls are messed up, and plays very slowly. Playable in Bios mode. -erexx

**Jet Moto 2** No, Plays for a while (part of first board) in Bios and HLE and then crashes

Jet Moto 3

**Jet Rider 2** Works Perfectly in both bios and HLE modes. - bucket61

Jimmy Johnson s VR Football 98

Jimmy Whites Cueball 2

**Johnny Bazoocatone** Works in v18 with defaults. Music acts up in game so I merely went into the option menu and turned the music off. Has not given me any issues yet (v18) -XDelusion

JoJo s Bizarre Adventure

**Jonah Lomu Rugby** Yes, Fine in both modes, better in BIOS -nufan

Judge Dredd

Juggernaut

Jump Start Wildlife Safari

**Jumping Flash** No, Dosent load In HLE, crashes in Bios once level is loaded -NeoCverA

**Jumping Flash 2** No, Hangs at load screen -ZildjianKX

Jumping Flash

Jungle Book Rhythm and Groove

**Junior League Dodgeball** - (BIN/CUE) - Works perfect with standard BIOS settings. (v18) -ressurrectionx  
Jupiter Strike

**Jurassic Park Lost World** - runs fine -ianmalcm \*V2\*

**Jurassic Park Special Edition : Lost World** not playable either way, crashes at/near title screen- ianmalcm / Still not working in v18 -Retroplay

**Jurassic Park Warpath** (IMG/CCD/SUB/CUE) Runs perfectly with standard bios settings Frameskip & Framelimit OFF. There is a very faint reverb at beginning of fight but goes away during battle (v18) -sotu  
K1 Arena Fighters  
K1 Grand Prix  
K1 Grand Prix 99  
K1 Revenge

**Kagero Deception II** - (IMG/CCD/SUB) - Works perfect with standard BIOS settings. (v18) -ressurrectionx

**Kartia** (Bin/Cue) Runs Perfectly w/ Standard Bios Settings (v18) -sotu  
Kasparov Chess

**Kensei: Sacred Fist** - (IMG/CUE/CCD/SUB) - Works with standard BIOS settings. Plays slow and music skips though, during FMV and play. Tried old frameskipping, lazy screen updates, but it didn't fix the problem. Turning Framelimit off helps a little but FMV is too fast then. (v18) -ressurrectionx

**Kickboxing** - (IMG/CCD/SUB) - Works with standard BIOS settings. Plays slow and music skips though, during FMV and play. Tried old frameskipping, lazy screen updates, but it didn't fix the problem. Turning framelimit off seems to help a little. (v18) -ressurrectionx

**Kileak The DNA Imperative** Works great with default BIOS settings (HLE crashes), but there's no XA sound in movies no matter what settings used (v18) -ressurrectionx

**Kileak - The Blood (PAL-E) [SCES-00035]** (BIN/CUE) - Works great with default BIOS settings (HLE crashes), but there's no XA sound in movies no matter what settings used (v18) -Retroplay

**Kill Wheel** \*\*Rare\*\* Bin/Cue Works Perfectly with standard settings, Turn Frameskip and Frame Limit OFF (v18) -sotu  
Killer Loop  
Killing Zone  
King of Fighters

**King of Fighters 95** Yes, HLE - Hangs at SCEA Presents screen (freezes emu), BIOS - Works (no music - BGM) -NeoCverA

**King of Fighters 98 JPN** Yes, works gfx slight glitches - jammi

**King of Fighters 99** - Works perfectly in Bios and Hle modes. -littleneo

**King's Field (Unreleased & Translated)** - (IMG/CCD/SUB) - Freezes Xbox in BIOS or HLE. (v18) -ressurrectionx

**King's Field I** - (IMG/CCD/SUB) - Works perfect with standard BIOS settings. (v18) -ressurrectionx

**King s Field II** - (ISO) - Works perfect with standard BIOS settings. Startup screens are a little glitchy. FMV and voice are good. Play is great. (v18) -ressurrectionx

**Kingsley s Adventure** - (IMG/CUE) - Works with standard BIOS settings. Old Frameskipping on, frameskipping off seems to make it a little faster. Perfectly playable. (v18) -ressurrectionx

**KISS Pinball** - (BIN/CUE) - Game is very glitchy in either BIOS or HLE. Title screens and menu screens are garbled and unnavigatable. It is possible to play the pinball if you press select and guess your way around the menu, but the gameplay is pretty lousy, otherwise, I would just mark this game as unplayable. (v18) -ressurrectionx.

**Klonoa Beach Volleyball** Works perfectly on v18 with standard settings (v18) -sotu

**Klonoa Door to Phantomile** (Img/Ccd/Sub) Works well with Standard Bios Settings (v18) -sotu

**Klonoa: Door To Phantomile PAL** Yes, Hangs in HLE Mode, use BIOS (FMV sound issues, everything else 95%) -jizzlobber  
Knockout Kings  
Knockout Kings 2000  
Knockout Kings 2001  
Konami Arcade Classics

**Koudelka** (Img/Ccd/Sub) Works Perfectly with Standard Bios Settings, Sound Timer Method set to ORIGINAL (v18) -sotu

**Koudelka JPN** - Works in HLE & BIOS, adventure mode is fine, but movies do not play properly, and the battles move slowly, but sound fine. -Kuis  
Krazy Ivan

**Kula World** (IMG/CCD/SUB/CUE) Runs perfectly with standard bios settings. Turn Frameskip & Framelimit OFF (v18) -sotu  
Land Before Time Return To The Great Valley - The  
Largo Winch  
League of Pain

**Legacy of Kain** - works in bios mode just about perfectly aside from some sound skipping in fmv's and ingame very minor though. -mjshl2

**Legacy of Kain: Soul Reaver** - (ISO) - Frameskip OFF, old frameskip ON, Throttle Method FIXED. Works better this way, game runs a bit slower than it's supposed to but it's not as choppy as it is with default settings. Some of the FMVs do not run fast enough and the speech is garbled. You can use the throttle button and speed it up and speech will sound good then. (v18) -Ressurrectionx

**Legacy of Kain: Soul Reaver PAL** Works but very choppy with standard bios settings. You need to patch your iso with the Paradox patch or the lipcrypt protection will prevent you from getting further into the game early on. You'll will not be able to use

Dualshock controller config because the Paradox PAL/NTSC selector is not compatible with it (pressing X or O does nothing). (v18) - Retroplay

**Legend of Dragoon** Bios mode works very well in v18: core 1.4, gpu 1.12, spu 1.16, disable CDDA ON; sound is only slightly choppy in some areas -ghaleon1103

**Legend of Legaia** not working game locks up in bios mode and randomly resets in hle mode. normally when you learn a new art skill -luther349 // Randomly locks up in bios mode when you're in battle (v18) -Retroplay

**Legend of Mana** - (IMG) - Works perfect with Standard BIOS settings. Played through the first boss fight. My only problem is that on some surfaces your characters footsteps sound real annoying, but game seems to play perfectly otherwise. (v18) -ressurrectionx

**LEGO Island II** - (BIN/CUE) - Works with standard BIOS settings. Gameplay seems to be a little tough with the directional pad. Totally playable though. (v18) -ressurrectionx

**LEGO - Rock Raiders** - (BIN/CUE) - Works perfectly with Standard BIOS settings. Played through the first level. No problems with gameplay or FMV sequences. (v18) -ressurrectionx

**LEGO Racers** - (BIN/CUE) - Works with standare BIOS settings. Like LEGO Rock Raiders, it seems hard to control it right and the framerate seems off a bit. The game is perfectly playable though otherwise. Played through one circuit race. (v18) -ressurrectionx

**Lemmings 3D** - (BIN/CUE) - Does not work in BIOS or HLE mode. Only tried with standard settings. After intro screens game music comes on but the screen is blank and you can't choose anything. (v18) -ressurrectionx

**Lemmings Oh No More Lemmings** this is a nightmare. textures missing, sound messed up, some lemmings won't even show. don't bother. -xuphor

**Lethal Enforcers I & II** - (IMG/CCD/SUB) - Game seems to work perfectly with Standard BIOS settings. Who wants to play a gun game with a controller though? Didn't test this with a lightgun because I have HDTV and I'm not even aware of how to use a lightgun. (v18) -ressurrectionx

**Lifeforce Tenka (PAL-E) [SLES-00613]** (BIN/CUE) - Unplayable because memorycard 2 can't be removed (v18) -Retroplay

**Little Mermaid 2** Bin/Cue Works Perfectly w/ Standard Bios Settings, set Sound Timer Method to ORIGINAL (v18) -sotu

**Little Princess ~Marl Oukoku no Ningyou Hime 2~ (J)** it will not work with bios or hle, i turned off the fast forward throttle, tried all kinds of different configurations with graphics filters and cpu fixes... all to no avail -elietehatelier

**LMA Manager 2002** - Works in HLE mode flawlessly. -XenShocker

**Loaded** - (IMG/CUE/CCD/SUB) - Gameplay is perfect in with Standard BIOS settings. You must turn CDDA off though, so there is no music during play and the intro song by the band Pop Will Eat Itself doesn't play. I love this game and it's a shame I can't get it to work without the music. It's just not the same. I tried everything. Played all the way through the first level. (v18) -ressurrectionx

**Lode Runner** - (BIN/CUE) - Bios mode, Set all Graphic Fixes (OFF), CPU Interpreter (ON), InuYasha Sengoku Battle fix (ON) Disable CDDA (ON), XA sound (ON). 100% playable @ 30fps (v18) -loderunner

**Lode Runner Extra** - Bios mode, Set all Graphic Fixes (OFF), CPU Interpreter (ON), InuYasha Sengoku Battle fix (ON) Disable CDDA (ON), XA sound (ON) (v18) -loderunner

**Lode Runner 2 Superlite** - (BIN/CUE) - does not work, freezes after LR logo (v18) -loderunner

**London Racer** - YES - Dfq23

**Looney Tunes: Sheep Raider** - (BIN/CUE) - Works perfect with standard BIOS settings. Cutscenes lok good and sound matches well. Press X sometimes in the loading screen if it is hanging and you will start the level. Remember to use the R1 & R2 buttons (top triggers) in the beginning to move the cameras around. I thought the game was freezing up on me, but it works just fine. Played through the training level without any problems. (v18) -ressurrectionx

**Looney Tunes Racing** - (BIN/CUE) - Works with standard BIOS settings. Turn frameskip off, old frameskip on and lazy screen updates on. Haven't been able to get what I assume to be a video sequence in the beginning with an announcer speaking to show. The voice plays, but the screen stays black. Loading times between levels is insanely long so don't forget to throttle. Played through one race and I have to say that as far as the gameplay goes, I'm pretty impressed with how fluid it plays. Many of the racing games on PSX are very slightly to very choppy and you don't get any of that here. Too bad the ridiculous loading times makes this game unplayable to me, because it is a pretty fun spin-off of Mario Kart. (v18) -ressurrectionx

**Lucky Luke** Does not work -bubbathemaster

**Lunar I: Silver Star Story** - (2 Disks - BOTH: ISO) - Works good with Standard BIOS settings. Also turn lazy screen updates on, old frame skipping off, and frameskip off, to improve the voices during cutscenes. Voices skip VERY slightly then, but the game seems perfect otherwise. Played about 15 minutes through most of the ice cave in the beginning. (v18) -ressurrectionx

**Lunar I: Silver Star Story (The Making Of)** - (IMG/CUE/CCD/SUB) - Works great with Standard BIOS settings. Documentary of a great classic RPG. (v18) -ressurrectionx

**Lunar II: Eternal Blue** - (3 Disks - ALL: ISO) - Lunar 2 Eternal Blue Works perfect in Bios, core:1.4, gpu:1.16, spu:1.9, old frameskip:on, frameskip:off, sound timer method:original, lazy screen updates:on (v18) -Mandoz // I seem to have a slight mismatch on the voices and the characters speaking, but it's not too annoying. Game seems to play perfectly otherwise. (v18) -ressurrectionx

**Lupin the 3rd special (J)** works perfect in Bios/HLE, default settings -deathx88

M & M s Shell Shocked

Machine Head

Machine Hunter

**Macross: Do You Remeber Love** - Near Perfect with HLE and Bios -Predalex

**Macross VF-X** - Seems to work perfect in bios mode voice is choppy at times. Freezes in HLE mode for me. -Predalex

**Macross VF-X 2** - Perfect in bios mode, some ingame movie cut scenes are deleted though. Same for HLE mode. -Predalex

**Macross Plus -Game Edition** - Runs okay but slows down a lot during battles in both HLE and Bios, cut scene sound is off and jittery. -Predalex

Madden NFL 2000

Madden NFL 2001

Madden NFL 2002

**Madden NFL 2005** - (IMG/CCD/SUB) - Works great with standard BIOS settings. Sounds good, play is smooth. Didn't even finish one game, but it seems to play very well. (v18) -ressurrectionx

Madden NFL 97

Madden NFL 98

Madden NFL 99

**Magic Carpet** - (BIN/CUE) - Works with standard BIOS settings. FMV voices don't skip at all. Don't really understand what I'm supposed to do on the game, but I was able to move around smoothly and pick up things and fire. Seems to work great to me. (v18) -ressurrectionx

Magic The Gathering Battlemage

Magical Racing Tour

Magical Tetris Challenge

**Marble Master** - (BIN/CUE) - Works with standard BIOS settings. Menus are all screwed up, but the game seems to play perfect. It's a puzzle game that I don't really get without the instructions, but seems to play very smoothly and as desired. Menu might cause a problem though between levels when it tallies up your score. (v18) -ressurrectionx

**Martian Gothic** - (BIN/CUE) - Works with standard BIOS settings. Voices are perfect. Gameplay is very smooth. Didn't play very long, but this seems to work great. (v18) -ressurrectionx

Marvel Super Heroes

**Marvel Superheroes Vs. Streetfighter** - (BIN/CUE) - Works great with standard BIOS settings. Gameplay, music and voices are smooth. Played several battles without a problem. (v18) -ressurrectionx

**Marvel Vs. Capcom** - (IMG/CCD/SUB) - Works perfect with standard BIOS settings. Played several battles with no complaint. (v18) -ressurrectionx

**Mary Kate & Ashley: Crush Course** - (BIN/CUE) - Works perfect with standard BIOS settings. (v18) -ressurrectionx

Mary Kate & Ashley's Magical Mystery Mall

Mary Kate & Ashley Winner Circle

Mass Destruction

**Masters of Monsters: Disciples of Gaia** - (BIN/CUE) - Works perfect with standard BIOS settings. Played through first level. I would say this game seems to be 100%. (v18) -ressurrectionx

Matt Hoffman's Pro BMX

**Matt Hoffman's Pro BMX** - (BIN/CUE) - Is playable in BIOS mode. CDDA does not work at all, but you don't have to disable it because it's not scratchy... it's just non-existent. Use old frameskipping, Lazy Screen Updates, turn off Frameskipping, Core version 1.4, GPU 1.15. If you don't use Core 1.4 there are major graphics glitches. Runs pretty smooth with these settings though. HLE doesn't seem to make any difference. (v18) -ressurrectionx.

**Maximum Force** - (BIN/CUE) - This game plays with standard BIOS settings but has major graphical glitches. This game plays just like Area 51 and for me has the exact same graphics problems that Area 51 had. It is split right down the middle of the screen and the action that should be on the right is on the left and vice versa. Tried a few graphics fixes and core versions, but couldn't fix this problem. (v18) -ressurrectionx

**MDK** - (BIN/CUE) - Works with standard BIOS settings. Music skips quite a bit during play which can get pretty annoying. Do the usual Frameskip off use old frameskipping and it should smooth out the play a bit. Played through first level. (v18) -ressurrectionx

**Mechwarrior II** - (BIN/CUE) - Works with standard BIOS or HLE settings. FMVs are unbearably slow. Gameplay seems a bit slow too and music skips the whole time. HLE mode seems to play slightly better. I didn't bother try any other fixes. I only played for about 5 minutes before getting extremely bored. (v18) -ressurrectionx

**Medal of Honor** - (BIN/CUE) - Works great with standard BIOS settings. It's been mentioned there is some slowdown, but I can't notice it. FMV and voices are great. Couldn't beat first level myself, but I think that's because it's real dark and I couldn't see where I had to go and not a problem with the game. (v18) -ressurrectionx

**Medal of Honor: Underground** - (BIN/CUE) - Works with standard BIOS settings. I put old frameskipping on, lazy screen updates on and old frameskip off, but I don't know for sure if it made it better. Seems like gameplay may be just a little slow. FMV works great. No skipping on the voices. Played through the first level without any problems. Did not try multiplayer. Turn off throttling because you'll use the triggers. (v18) -ressurrectionx

**MediEvil** Bin/Cue Works Perfectly with Standard Bios Settings, set Sound Timer Method to ORIGINAL (v18) -sotu

**MediEvil 2** No, has sprite issues on the main menu. hangs when i try to enter a game (BIOS/HLE) - razorrifh

**Mega Man Battle and Chase** Bios- runs fine, slower in 2 players. -deathx88

**Mega Man Legends** Perfect in HLE and BIOS -charpunk

**Mega Man Legends 2** locks up system -Xdelusion

**Mega Man VIII: Anniversary Collectors Edition** - (BIN/CUE) - Works great in BIOS mode. No slowdown in game at all. FMV looks great. Played through first level. (v18) -ressurrectionx

**Mega Man X4** - (BIN/CUE) - Works great in BIOS mode. No slowdown in game at all. FMV looks great. Played through first level. (v18) -ressurrectionx

**Mega Man X5** - (BIN/CUE) - Works great in BIOS mode. No slowdown in game at all. FMV looks great. Played through first level. (v18) -ressurrectionx

**Mega Man X6** - (IMG/CCD/SUB) - Works great in BIOS mode. No slowdown in game at all. FMV looks great. Played through first level. (v18) -ressurrectionx

Men In Black

**Metal Gear Solid** – (2 Disks - BOTH: IMG/CUE/CCD/SUB) - Works Perfect in BIOS mode. Lazy Screen Updates ON, Use Old Frame Skipping ON, Frame Skip OFF, Frame Limit ON, Wait CPU Action ON, Sound Timer Method Original. FMV and game play great. (v18) -ressurrectionx

**Metal Gear Solid: Integral (PSOne Books version)(J)** Bin/Cue, BIOS, 1.5, 1.16, 1.9, Lazy Screen Updates On, Frame skip ON, Frame limit ON, XA - ON, Wait CPU Action ON, Sound Timer Method - Original: It's playable....graphic glitches/slowdown in some movies. Sound glitches slightly sometimes as well during those movies. But... I did a save state right after i beat revolver ocelot, before he gets his hand cut off. I get past the movie after Revolver Ocelot that gives everyone problems!!! if you let it play, it seems to go alright. if you want to skip ahead of it, wait till Baker mentions "Hal Emmerich" before attempting to skip (v18) -A Murder of Crows

**Metal Gear Solid (J)** - Will not Boot -Kuis

**Metal Gear Solid: VR Missions** - (BIN/CUE) - Works Perfect in BIOS mode. Lazy Screen Updates ON, Use Old Frame Skipping ON, Frame Skip OFF, Frame Limit ON, Wait CPU Action ON, Sound Timer Method Original. Gameplay is great. Voice skips pretty bad a little after you beat a mission. (v18) -ressurrectionx

**Metal Slug X** - (IMG/CCD/SUB) - Works perfect in BIOS mode with standard features. No slow down at all. Voices sound good. Played through first level. (v18) -ressurrectionx Michelin Rally Masters

**Micro Machines V3** – (IMG/CUE/CCD) - Works perfect with standard BIOS settings. Cool little racing game. I completed several of the races without any problems. (v18) -ressurrectionx

**Micro Maniacs Racing** - (BIN/CUE) - Works perfect with standard BIOS settings. I completed several races without a problem (v18) -ressurrectionx

Mike Tyson Boxing

**Misadventures of Tron Bonne, The** -Works with BIOS (default settings) with slight problems. You can't see some of the text in the game (conversations. Unmap the throttle. (v18) -Liquidvlade Hiraduo

Miss Spider's Tea Party (Simon & Schuster)

**Missile Command** - (BIN/CUE) - Works great with standard BIOS settings. FMV looks good with no audio skipping. Game plays very well. Played through first several levels. (v18) -ressurrectionx

Mission Impossible

MLB 2000

MLB 2001

MLB 2002

MLB 2003

**MLB 2004** Yes, Locked up in HLE, Bios worked Fine, Not Very Playable, Commentary is a bit off. But you can play! -Orangey

MLB 98

MLB 99

MLB Pennant Race

**MLS Soccer Night** BIN/CUE (CDRWIn) run a bit faster than usual, but you can make it run slightly slower if frameskip is disabled and framelimit is enabled (v18) -Lempt

Mobil 1 Rally Championship

Mobile Armor

Monaco Grand Prix

Monkey Hero

Monkey Magic

**Monopoly** BIN/CUE Works perfectly with standard bios settings (v18) -sotu

**Monster Rancher: Battle Card Episode II** - (BIN/CUE) - Works with standard BIOS settings. Music can skip quite a bit at times, but it's not too bad. I didn't try to fix the music. Music is fine during battle. Played through one whole battle without any problems. (v18) -ressurrectionx

**Monster Rancher: Hop About** - (BIN/CUE) - Works with standard BIOS settings. Music will skip and there doesn't seem to be anything you can do about that but game plays fine anyhow. Music skipping really only annoying during the title sequence. Played through the first 6 or 7 courses and gameplay is smooth. (v18) -ressurrectionx

**Monster Rancher I** - (BIN/CUE) - Works great with standard BIOS settings. Music sounds good, gameplay is smooth. Didn't play very far because these games bore me, but it seems to work without any problems. (v18) -ressurrectionx

**Monster Rancher II** - (IMG/CCD/SUB) - Works with standard BIOS settings. Intro video is slow and skips. (Not sure about any other video in game) . Music seems much better during the actual game. (v18) -ressurrectionx

Monster Seed

**Monsters Inc. Scream Team** Works with Bios and Hle modes, but animation sequences skip a lot and have no sound -skabio

**Moorhuhn (PAL)** works perfectly in both modes (v18) -J mo

**Moorhuhn 2 (PAL)** works perfectly in both modes (v18) -J mo

Mort the Chicken

**Mortal Kombat II** works 100% -SHIZNO

**Mortal Kombat III** - (IMG/CCD/SUB) - Does not work in either BIOS or HLE mode. It shows opening logo in both modes then crashes (v18) -ressurrectionx

**Mortal Kombat IV** - (IMG/CCD/SUB) - Works great with standard BIOS settings. Played several fights without a problem. (v18) -ressurrectionx

**Mortal Kombat Mythologies: SUB Zero** - (BIN/CUE) - Works great with standard BIOS settings. Can't get past the ceiling that crushes you, but that's because I don't know what to do and not because of the game. Because of that, haven't been able to test it too far, but everything seems to work perfectly. (v18) -ressurrectionx

**Mortal Kombat: Special Forces** - (IMG/CCD/SUB) - Works great with standard BIOS settings. Music sounds good. Played through first level. (v18) -ressurrectionx

**Mortal Kombat Trilogy** - (IMG/CCD/SUB) - Works great with standard BIOS settings. Music sounds good. Played a few fights without any problems. (v18) -ressurrectionx

**Motorhead** Disable frameskip, and enable old frameskip, as well as enabling lazy screen updates so that you can see opening menu. Rest all default. Game plays very smoothly, although CDDA skips badly. I choose to disable CDDA personally. Tested on v18 - barman1176

**Motor Toon Grand Prix** - (IMG/CCD/SUB) - Works great with standard BIOS settings. Played the first two races without any problems. Smooth graphics and sound. (v18) -ressurrectionx

**Mr. Driller** - (BIN/CUE) - Works perfectly with standard BIOS settings. Played through first level. (v18) -ressurrectionx

**Ms. Pac-Man - Maze Madness** - (IMG/CCD/SUB) - Works great with standard BIOS settings. CDDA buzzes a little bit in some menu screens, but the sound still works too. Don't disable CDDA unless the buzzing gets on your nerves. Played the first two levels though without any problems. (v18) -ressurrectionx

**Myst** - (BIN/CUE) - Locks up the Xbox in both modes. (v18) -ressurrectionx

**N GEN Racing** Yes, BIOS Perfect Graphics and SFX, NO SOUNtrack(CDDA) - Xboxed

[color=green]**N2O Nitrous Oxide** Tested on v3 Runs about 80% speed on HLE and BIOS, runs 99% if you disable CDDA. - openwindow

Nagano Winter Olympics 98

**NAMCO Museum Vol 1 N** Yes, works in BIOS. Hard locks in HLE after NAMCO splash screen. -Dahak

NAMCO Museum Vol 2 A

**NAMCO Museum Vol 3 M** Yes, works in BIOS. Hard locks in HLE. -Dahak

**NAMCO Museum Vol 4 C** Requires BIOS mode, museum and all games except for 'The Genji and Heike Clans' work perfectly.- Dahak

NAMCO Museum Vol 5 O

**Nanotek Warrior** - (BIN/CUE) - Works great with standard BIOS settings. Played through first level. (v18) -ressurrectionx

**Necronomicon** HLE works if you use the InuYasha Battle Fix (v18) -XDelusion

**Nectaris: Military Madness** - (IMG/CUE/CCD/SUB) - Works great with standard BIOS settings. Played through first level without any problem. (v18) -ressurrectionx

Need for Speed

Need for Speed 2

**Need for Speed 3 Hot Pursuit** Yes, Graphics and Sound are nearly perfect, but the game runs slow... -Executor

**Need for Speed 4 High Stakes** runs in bios mode, disable CDDA , HLE just freezes -Victor Von Doom

**Need for Speed V: Porsche Unleashed** - (BIN/CUE) - Works great with standard BIOS settings. FMVs look and sound great. Music seems just slightly choppy during gameplay. Played a few races. (v18) -ressurrectionx

Need for Speed V Rally

Need for Speed V Rally 2

Newman Haas Racing

**Next Tetris, The** (bin/cue) works fine, but a tip is to first thing you do go to the options within the game and turn off the CDmusic and then save, so that you wont have to hear that horrible screeching sound (other sounds work well) (v18) -taonaut

**NFL Blitz** Yes, works cant see players in game only their shadows - jammi

**NFL Blitz 2000** Yes, partially works in Bios Mode , no player sprites. Still playable. Crashes in HLE.-Iantus

NFL Blitz 2001

NFL Full Contact

**NFL Game Day** the sound at the menu is screwed up, gameplay seems perfect -rimsky82

**NHL Rock The Rink** - Runs, but is unplayable due to frameskipping -chillin\_dude

Nicktoons Racing

**Nightmare Creatures I** - (IMG/CCD/SUB) - Freezes up Xbox in both modes. (v18) -ressurrectionx

**Nightmare Creatures II** - (IMG/CCD/SUB) - Works with standard BIOS settings. Game is very hard to control and seems real jerky.

Almost not worth playing. FMV looks and sounds good. (v18) -ressurrectionx

**Ninja: Shadow of Darkness** - (IMG/CCD/SUB) - Works great with standard BIOS settings. Played through first level. (v18) -ressurrectionx

**Nitrous Oxide N2O (PAL)** IMG/CCD/SUB Works perfectly with standard bios settings. Turn Disable CDDA to ON in Set CPU Fixes, this will get rid of the buzzing sound during game (v18) -sotu

**No Fear Downhill Mountain Biking** Yes, works in bios mode with some artifacts in the video, doesn't boot in HLE mode -chupal

**No One Can Stop Mr. Domino** BIN/CUE Works Perfectly with standard bios settings (v18) -sotu

**Norse By Norsewest The Lost Vikings** Works perfect in Bios, default settings (v18) -Mandoz

NovaStorm

**Nuclear Strike** Yes, a little slow -desertboy

**ODT Escape Or Die Trying** MDF/MDS Does not work, freezes to black screen (v18) -sotu

**Off World Interceptor Extreme** BIN/CUE Works perfectly with standard bios settings Frameskip OFF (v18) -sotu

**Ogre Battle: Limited Edition** - (BIN) - Works great with standard BIOS settings. (v18) -ressurrectionx

Olympic Soccer

Olympic Summer Games

**Omega Boost** - (IMG/CCD/SUB) - Works with standard BIOS settings. FMV sequences skip a lot and so do the voice tracks on them, making them virtually unwatchable. Gameplay seems perfect though. Played through two levels. (v18) -ressurrectionx

**Omega Boost PAL:** Works great in bios mode, default settings, old frameskip on -running with scissors

**ONE** works great with normal settings in Bios Mode, seems a little fast though- hardcorekid

**One Peace Mansion** Pretty much perfect with default settings. Tested on v18 -barman1176

**One Piece Grand Battle 2:** It works fine in BIOS mode (All CPU fixes off), but freezes up in HLE mode. And sometimes it glitches up for no good reason when you use throttle, but that'll have to suffice for me. 90% -kokenjr

**OverBlood** (IMG/CUE) Works perfect with default bios settings (v18) -Retroplay

**OverBlood 2 PAL** (bin/cue) - Works in bios but suffers from heavy frameskipping in cutscenes, fully playable though (v18) -Retroplay

**Pac Man 3D World** The audio is a little bit choppy and the gameplay is not as smooth as the original PSX console, but the game runs really well. I ran the game using PCSXBOX v18, BIOS mode, and core version 1.6. All of the other settings default -phofighter408

Pajama Sam You Are What You Eat

**Pandemonium** Yes, Works in Bios, had some issues but playing with settings gets near 100%. -blitz6

Pandemonium 2

**Panzer Bandit** Works with bios/hle. Fullspeed in gameplay, skips a bit while in title screen, character select, and ending credits. otherwise, perfect. -kaioshade

Panzer Front

Panzer General

Paper Boy

**PaRappa The Rappa** - (BIN/CCD) - Works perfect with standard BIOS settings. Played to the 4th level. (v18) -ressurrectionx

**Parasite Eve I** - (1 Disks - BOTH: IMG) - Works perfect with standard BIOS settings. One thing that I've noticed is that the game freezes every once and a while and it's real annoying if you haven't saved it for a while. Make sure to save often on this one. (v18) -ressurrectionx

**Parasite Eve II** - (2 Disks - BOTH: IMG/CUE/CCD/SUB) - Wont play in BIOS mode. Play in HLE mode and you should be fine. FMV looks great. Game seems to play fine. Didn't play for that long though. (v18) -ressurrectionx

**Parodius Tokimeki** Will not work in Bios nor HLE mode -dmb062082

**Patriotic Pinball** - (BIN/CUE) - Works with standard BIOS features. Played one full game and didn't seem to have any problems other than the fact that it started a 2 player game and I didn't tell it to. Long blank screen before table loads and I'm thinking that there is supposed to be a screen here to select how many players. other than that works 100% (v18) -ressurrectionx

Peak Performance

**Pepsi Man The Running Hero** - Works great in HLE and Bios. Some cdda audio slowdown but it doesnt effect gameplay. -gamemaster14

Perfect Weapon

**Persona 2 Eternal Punishment** Slightly skippy music in FMV intros. Perfectly playable.99% (Frameskip, Framelimit) -darkstalker

**Persona I: Revelations** - (BIN/CUE) - Works perfect standard BIOS settings. (v18) -ressurrectionx

Peter Pan Return To Neverland

PGA Golf Tour '96

**PGA Golf Tour '97** - (BIN/CUE) - Works perfect with standard BIOS settings. (v18) -ressurrectionx

PGA Golf Tour '98

**Philosoma** - (BIN/CUE) - Works kind of with standard BIOS settings. I tried turning off frameskip like suggested, but this game won't stop flashing for me. Plus you have to disable XA sound processing if you want it to run at normal speed. (v18) -ressurrectionx

**Pipe Dreams** BIN/CUE Works Perfectly with standard bios settings, not sure how or if you're even supposed to be able to rotate the pipes directions. If not then the game works perfectly since I can't seem to turn the pipes (v18) -sotu

Pitball

**Pitfall 3D: Beyond The Jungle** - (IMG/CCD/SUB) - Works with standard BIOS settings. Frameskip off, Old Frameskip on, Lazy Screen Updates on. FMV very smooth and sounds good. Game seems a little rough, but is perfectly playable.(v18) -ressurrectionx

Planet Of The Apes

Play With the Teletubbies

**PO' ed** Runs great in both HLE/BIOS modes -prican24 // (IMG/CUE/CCD/SUB) - Won't work in BIOS or HLE mode. Game freezes on loading a new game. (v18) -ressurrectionx

**Pocket Fighter** - (IMG) - Playable with Standard BIOS settings. Play is slow though and music skips. Sometimes it will lock up the Xbox (v18) -ressurrectionx

**Point Blank I** - (BIN/CUE) - Works perfect with standard BIOS settings. 100%. Played through several courses. (v18) -ressurrectionx

**Point Blank II** - (IMG/CCD/SUB) - Works perfect with standard BIOS settings. 100%. Played through several courses. (v18) -ressurrectionx

**Point Blank III** - (BIN/CUE) - Works perfect with standard BIOS settings. Played through several courses. Only problem that I saw was that one of the menu screens is screwed up but the rest of the game seems to play fine. (v18) -ressurrectionx

Point Blank No Gun

Polaris SnoCross 2000

**Policenauts (J)** Works perfect in Bios, default settings (v18) -Mandoz

**Pong: The next Level** Runs in BIOS mode perfect with IRQ in Decoded Sound Buff (Crash Team Racing) ON (v18) -LLeWop

Poohs Party Games In Search Of The Treasure

**Pool Academy** (BIN/CUE) Bios: Loads, but doesn't show graphics after the Sunsoft logo screen - HLE: Doesn't load (v18) -Lemtp

Pool Hustler

**Pool Shark** - Works in default bios mode.. 90% speed , minor grafx glitches. -VERBALKENT

Popstar Maker - YES - HighCode

**Populous III: The Beginning** - (BIN/CUE) - Plays well in BIOS mode. Sound skipps a little bit in FMVs but not so much to really be annoying. They look good too, but may be a little slow. Voice sounds good in game. I have no clue what I'm supposed to do so I'm stuck on the first island, but voices and gameplay seem just fine. (v18) -ressurrectionx

**Porsche Challenge** (bin/cue) Works in bios mode but suffers from low framerates. Works fine though (v18) -Retroplay

Power Move Pro Wrestling

Power Play Sports Trivia

**Power Puff Girls Chemical X-Traction** BIN/CUE Works Perfectly with standard bios settings (v18) -sotu

Power Rangers LightSpeed Rescue

Power Rangers Time Force

Power Rangers Zeo Power Pinball

**Power Serve Tennis** Yes,-nx-neon

**Power Shovel** - (IMG/CUE/CCD/SUB) - Works with standard BIOS settings. Title screen and menus can be really screwed up but gameplay seems just fine. Only played the first level before getting bored of it. (v18) -ressurrectionx.

**Powerslave** - (BIN/CUE) - Works perfect with standard BIOS settings. Through this game thorough several hours and levels. Smooth voices and gameplay (v18) -ressurrectionx

Power Spike Pro Beach Volleyball

**Poy Poy I** - (IMG/CCD/SUB) - Works Great with standard BIOS settings. Played several rounds into the game. Exhibition only works though. The Poy Poy Cup seems to get stuck in the loading screen when the announcer is talking. (v18) -ressurrectionx

**Poy Poy 2** Yes, -ker

Primal Rage

Pro 18 World Tour Golf

**Pro Pinball** - (BIN/CUE) - Does not work in BIOS or HLE. Menus are all messed up and the table is unplayable because of graphic glitches. (v18) -ressurrectionx

**Pro Pinball: Big Race USA** - (BIN/CUE) - Does not work in BIOS or HLE. Menus are all messed up and the table is unplayable because of graphic glitches. (v18) -ressurrectionx

**Pro Pinball: Fantastic Journey** - (BIN/CUE) - Does not work in BIOS or HLE. Menus are all messed up and the table is unplayable because of graphic glitches. (v18) -ressurrectionx

**Pro Pinball: Timeshock** - (IMG/CCD/SUB) - Where to start.... With standard BIOS settings, this one has bad CDDA, the menus are all messed up and the table is unplayable most of the time because of the graphic glitches. HLE won't even load. (v18) -ressurrectionx

Project Horned Owl

**Project Overkill** Bios/HLE, game runs almost flawless

**Project X2** Yes ,Works nicely but there are sprites problems , somme missings sprites in GUI & game (principally own ship). Kinda strange that sometime , the ship appears.. -sunseeker

Psybadek

**Psychic Force** - (IMG/CCD/SUB) - Works great with standard BIOS settings. FMV looks and sound great. Play is smooth. Only thing that bothers me is that sometimes it seems like my character gets stuck and just floats there for no reason and I can't make them move, even though I can get to the menu screen on the Xbox. Played about 3 fights. (v18) -ressurrectionx

**Puma Street Soccer** (BIN/CUE) (BIOS) Hangs on menu. (HLE) Game goes very fast, but it's still playable, other than that, no errors (v18) -Lempt

**Punch the Monkey** BIN/CUE Works perfectly with standard bios settings, Turn Frameskip & Framelimit OFF (v18) -sotu  
Punky Skunk

**Putter Golf** - (BIN/CUE) - Works with standard BIOS settings. Disable XA sound processing because the music on the game plays ridiculously fast and I couldn't figure out how to stop that from happening. 100% playable otherwise. (v18) -ressurrectionx

**Puzznic** IMG/CCD/SUB Works perfectly with standard bios settings (v18) -sotu

**Q-Bert** - (BIN) - Works sort of with Standard BIOS or HLE settings. Inyasha fix does nothing. Menus are really screwed up and gameplay is pretty bad too. Almost unplayable. FMV looks great. (v18) -ressurrectionx

**Qix Neo** BIN/CUE Works perfectly with standard bios settings (v18) -sotu

**Quake II** - (BIN) - Works perfect with Standard BIOS settings. Played through several levels without a problem. FMV looks great and voice doesn't stutter. (v18) -ressurrectionx

R/C Stunt Copter

**R-Type Delta** - (BIN/CUE) - Game works great with standard BIOS settings. Good FMV and play is smooth. (v18) -ressurrectionx

**R-Types** - (BIN/CUE) - Does not work. Crashes right after IREM screen in either mode. You can still get back to the game select screen though. (v18) -ressurrectionx

Racing

**Rage Racer** - Works in Bios and HLE modes. ingame music is a bit skippy, and game runs a bit slow. -Bluecat \*V2\*

Rageball

**Raiden DX:** Laggy intro on BIOS (just skip ) works perfect HLE: Works good then crashes after a minute -big\_xbox\_n00bie

**Raiden Project** Yes , Perfect - b11051973

Railroad Tycoon 2

Rainbow Six - Tom Clancy's

Rainbow Six: Lone Wolf

Rainbow Six: Rogue Spear

**Rakugaki Showtime (J)** BIN/CUE Works Perfectly with standard bios settings. Japanese very playable and very fun. Looks like multiplayer dodgeball on crack! (v18) -sotu

**Rally Cross** Works in bios mode. With frame limit set to 'on' the game runs a bit sluggish at times, especially when making turns. But if you set frame limit to 'off' the game often runs too fast. Either way the game is very playable. - Thraxen

**Rally Cross 2** Yes -krackheadbill

**Rampage I: World Tour** - (BIN/CUE) - Works great with standard BIOS settings. 100%. Played about 10 levels. (v18) -ressurrectionx

**Rampage II: Universal Tour** - (BIN/CUE) - Works perfect with standard BIOS settings. Only thing is that the voice is a little out of sync on FMV. Otherwise perfect. Played through several levels. (v18) -ressurrectionx

**Rampage Through Time** - (BIN/CUE) - Works great with standard BIOS settings. Voices don't work on the FMVs, but gameplay is very smooth and enjoyable. Played several levels. (v18) -ressurrectionx

**Ranma Battle Renaissance (NTSC JPN):** Works fine in BIOS (All CPU fixes off), but freezes up in HLE -kokenjr

**Rapid Reload (E)** - European version of Gunners Heaven. Everything for it applies here -darkstalker

Rascal

Rat Attack

**Ray Crisis** - (BIN/CUE) - Works, but not very well in BIOS mode. Freezes at the memory card check screen in HLE mode. Game can play well but becomes slow to the point of not even being able to see what's going on or control your guy while he dies. Virtually unplayable. Graphics fixes seem to do very little. (v18) -ressurrectionx

**Ray Storm** Works 100% in Both Modes -Kacique

**Ray Tracers** - (IMG/CUE/CCD/SUB) - Works great with standard BIOS settings. Gameplay is very smooth. Played first race. Haven't been able to beat the boss though. (v18) -ressurrectionx

**Rayman I** - (BIN/CUE) - Does not work in BIOS or HLE modes. Hangs on Ubi Soft screen. Music skips there too, so it probably wouldn't play great even if it did load. (v18) -ressurrectionx

**Rayman I (PAL-E) [SLES-00049]** (BIN/CUE) - Gets stuck at UBI Soft screen (v18) -Retroplay

**Rayman II: The Great Escape** - (BIN/CUE) - Doesn't work well enough to consider playable in either mode. HLE is screwed up from the start with the strobe effect. BIOS seems almost playable although the cutscenes are horrific. Game freezes whenever it feels like it and will occasionally make buzzing noises as if the CDDA didn't work properly. Whoever made this emulator was no fan of Rayman. (v18) -ressurrectionx

**Rayman Brain Games** - (BIN/CUE) - Doesn't work In BIOS or HLE mode. Music skips weird and menus are black. When you do get somewhere, you can't control anything. (v18) -ressurrectionx

**Rayman Rush** - (BIN/CUE) - Only slightly playable with standard BIOS settings. Game is jerky and makes weird noises that are very annoying on occasion. If you can live with that, it seems like a fun game and is playable enough to be somewhat enjoyable. (v18) -ressurrectionx

**Raystorm** - (BIN/CUE) - Works with standard HLE settings. In BIOS every once and a while (about 3 times per level) your ship will automatically fly straight one direction and you will be unable to control it or fire. Usually lasts 5 seconds, or enough to get you

killed. HLE mode seems to fix this. (v18) -ressurrectionx

Razor Freestyle Scooter

Razor Racing

**RC de Go!** - (BIN/CUE) - Works great with standard BIOS settings. Voice and music are good. Gameplay is smooth. Played several races. (v18) -ressurrectionx

**RC Stunt Copter** - (BIN/CUE) - Works somewhat with standard BIOS settings. Freezes in HLE. Menus have no text on them. Hard to navigate to gameplay and when you get there the chopper is invisible. Don't know how to fix any of this. (v18) -ressurrectionx

RC Racer

RC Revenge

Ready 2 Rumble Boxing

Ready 2 Rumble Boxing Round 2

**Real Bout Special (J)**- Yes, works perfect but no music sound fx are there - jammi

**Reboot** Hangs on Loading screen in both HLE and BIOS mode -skyblast

Red Asphalt

Reel Fishing

Reel Fishing 2

**Re-Loaded** - (BIN/CUE) - Works perfect with standard BIOS settings. Played through first level. Gameplay and music is smooth. FMV looks great. (v18) -ressurrectionx

Renegade Racers

Rescue Heroes Molten Menace

**Resident Evil** Yes, HLE: Good ~Sound Good. Graphics Good. BIOS: Good ~Sound Good. Graphics Good. -erexx

**Resident Evil 2** Yes, Works in HLE and bios, but HLE gfx are superior. -elduderino1234

**Resident Evil 2 PAL** Yes, Works, no errors and good speed. (remap R1 to a different button with LTHUMB - this also works for Resident Evil 1) - Dante\_Ali

**Resident Evil 2 Dual Shock Version** Works only in HLE mode. Sound good, Video good. - Redhat39

**Resident Evil 3 Nemesis** - [/b]needs to be run in Bios with old frame skipping turned on, frame limit turned off and the Inu Yasha Battle Fix enabled in CPU fixes. The battle fix really throws off the speed of the game so you need to compensate with the other settings. I also set the graphics filter to HQ2X during the movies and switch it to SuperScale2X during gameplay. Not perfect but damn near. -cupcake4u / also see notes above for this game

**Resident Evil 3 Nemesis PAL** - Works. You need to have your ISO patched first, else the copy protection will stop the game from playing! -horscht

**Resident Evil: Director's Cut** - (BIN/CUE) - Workes perfect with standard BIOS settings. Played for about 20 minutes without any problem. Voice sounds as good as original. (v18) -ressurrectionx

**Resident Evil: Director's Cut PAL** - Works with Bios

**Resident Evil Directors Cut Dual Shock Version** Works Fine in BIOS With Throttle unmapped. Some sound glitches every now and then nothing that takes away from the game. 98% Perfect -question mark

**Resident Evil: Survivor** - (IMG) - Works perfectly with standard BIOS mode. Played for about 15 minutes without any problems.

(v18) -ressurrectionx**Return Fire** - (BIN/CUE) - Works well with standard BIOS settings. Game music skips a bit. HUD display flickers quite often which can get annoying. Plays perfectly fine otherwise. This game is good for a few laughs. (v18) -ressurrectionx

Re-Volt

Revolution X

**Rhapsody: A Musical Adventure** - (BIN/CUE) - Will not even attempt to load. Screen goes black for a split second and then returns to game select screen. I did this several times and it locked up my Xbox. (v18) -ressurrectionx

**Ridge Racer** - (IMG/CUE/CCD/SUB) - Works with standard BIOS settings. Disable CDDA to turn off the annoying buzzing because music doesn't work. Otherwise, I played one race and it seems to play great. (v18) -ressurrectionx

**Ridge Racer: Revolution** - (IMG/CCD/SUB) - Plays very well with standard BIOS settings. Played through one race and it played pretty smooth. Played through one race. That announcer's voice is very annoying, but that's not the emulator's fault. (v18) -ressurrectionx

**Ridge Racer: Type 4** - (IMG/CCD/SUB) - Plays with standard BIOS settings. Gameplay during race is slow and choppy. FMV looks great. Title screen is pretty messed up though and loading screens flicker and have glitches as well. Menus are practically unusable half the time because of the graphics glitches. Did not try other graphics settings to fix it though. Played through one race. (v18) -ressurrectionx

Rise 2: The Resurrection

**Rising Zan: The Samurai Gunman** - (BIN/CUE) - Works with standard BIOS settings. FMV looks smooth and sounds great. Gameplay is very smooth, but far away backgrounds seem messed up until you get closer. It could have been that way in the original though. Played through the first level. (v18) -ressurrectionx

**Risk** Starting menu sound is horrible screeching noises; once you make your selection and play the game it works 100% with default settings. Tested on v18 -barman1176

**Rival Schools I** - (2 Disks - BOTH: IMG/CCD/SUB) - Works with standard BIOS settings. FMV looks and sounds great. Title screen and menus are garbled and you can't see all the options. Gameplay seems a bit slow. Didn't try any other settings on this. Played through one fight. (v18) -ressurrectionx

**Rival Schools (J)** Yes, arcade mode works ok with bios and crash at battle beginning with HLE, video glitches and desynch -radius

**Rival Schools 2 (J)** 100% bios mode, hle runs too fast -jammi

**Riven: The Sequel To Myst** - (5 Disks - ALL: ISO) - Works with standard BIOS settings. Looks good though, and seems to do what it is supposed to be doing. Voices don't seem to sync up well, but it doesn't look like it would affect gameplay at all. UPDATE: Game froze for me when I sat on some weird looking throne in a cave and I operated the lever. Xbox didn't freeze though. This also happened when I tried HLE mode. Not sure now if this is fully playable or not. (v18) -ressurrectionx

**Road Rash Jailbreak** Runs in Hle mode, did not test bios mode. -Deltronik

Road to El Dorado - The

**Roadsters** - (BIN/CUE) - Playable with standard BIOS settings. Turn on old frameskipping and lazy screen updates and it plays pretty smooth. Music skips and repeats. I couldn't fix the music. Probably better off playing another racing game overall. (v18) -ressurrectionx

**Robo Pit** Seems to work perfectly but there is no in-game music. I can't remember if there was music while playing because it's been so long. Can anyone else remember if there was music or not? 95% (Frameskip, Framelimit) -darkstalker

**Robo Pit II** - (BIN/CUE) - Plays great with standard BIOS settings. FMV looks great. Gameplay is smooth. Played through first battle. (v18) -ressurrectionx

**Robotron X** - (BIN/CUE) - Does not play in BIOS mode because it is extremely fast and you can't even tell what's going on. HLE mode freezes XBOX. (v18) -ressurrectionx

**Rock'em Sock'em Robots Arena** - (BIN/CUE) - Works with standard BIOS settings use old frameskipping and lazy screen updates. Turn off CDDA because it skips and game plays pretty well then. (v18) -ressurrectionx

Rocket Power Team Rocket Rescue

Rock'N Roll Racing 2

**Rogue Trip: Vacation 2012** - (BIN/CUE) - Works enough to be playable with standard BIOS settings. FMV looks great and voices are good. Disable CDDA though because the music skips during gameplay. Many of the menu screens won't show for me, so I have to guess at what I'm doing all the time. Makes it very difficult to buy things between levels. Doesn't work at all in HLE. Definitely worth playing though. Fun little Twisted Metal clone. (v18) -ressurrectionx

**Roll Away** - (IMG/CUE/CCD/SUB) - Works perfect with standard BIOS settings. Played about 10 levels. Fun little puzzle game. (v18) -ressurrectionx

**Roll Cage I** - (BIN/CUE) - Plays in BIOS mode. Disable CDDA to speed up the game because music skips anyways. Gameplay is smooth. Loading in the beginning of the game just to get to the title screen takes insanely long, for seemingly no reason at all, so I'd probably just skip this one and play Roll Cage II which plays great. (v18) -ressurrectionx

**Roll Cage: Stage 2** - (BIN/CUE) - Plays well with standard BIOS settings. Disable CDDA to speed up the game because music skips anyway FMVs look great. Smooth gameplay. Played a few races. (v18) -ressurrectionx

Romance Of The 3 Kingdoms IV

**Romance Of The 3 Kingdoms VI** doesnt work, hangs at load screen. -big\_xbox\_n00bie

Ronaldo V Soccer

**Ronin Blade** Use Core 14. Disable Frameskip, and enable old frameskip as well as lazy screen updates. CDDA Skips pretty badly. Still very playable. Tested on v18 -barman1176

**Ronin Blade (PAL)**: Runs great in both modes. -t!dus\_beta

Rosco McQueen Fire Fighter Extreme

Roswell Conspiracies: Aliens Myths & Legends

**RPG Maker** - (BIN/CUE) - Works sort of with standard BIOS settings. I didn't play this much because it didn't seem nearly as cool as it sounded. There may be problems with a few of the menus, or maybe nothing is supposed to be there because I didn't make something yet, at parts. Hard to describe. I'll say for now it works though unless somebody else really tests it out and says otherwise. Won't freeze your Xbox or anything. (v18) -ressurrectionx

**R-Types** Crashes the xbox in BIOS mode after the IREM screen; HLE mode after the IREM screen just stays at a black screen but you can at least exit -prican24

**R-Type Delta** - Yes, (HLE-Failed BIOS-Worked) FMV sluggish and fmv sound - INGAME runs great - NeoCverA

**R-Types** Crashes in Both Modes -erexx

Rugrats in Paris: The Movie

Rugrats Studio Tour

Rugrats Totally Angelica

**Rugrats: Search For Reptar** - (BIN/CUE) - Works great with standard BIOS settings. Played one level without any trouble. Voice can be scratchy, but the game hardly talks at all so no big deal. (v18) -ressurrectionx

**Runabout II** - (BIN/CUE) - Plays with standard BIOS settings. Menus are terrible and you have to guess on a lot of selections. Gameplay is great though otherwise. (v18) -ressurrectionx

**Running Wild** (bin/cue) Works nicely with some minor graphics glitches (notably the character models prior to a race) (v18) -TyBO

**Rurouni Kenshin Ishin Gekitouhen (J)**- Works fine in HLE/BIOS. (All CPU fixes off and Frame skip on). Slight glitches at times, but not all too noticable. 95% -kokenjr

**Rurouni Kenshin RPG** Works perfectly in Bios, but freezes up in HLE (All CPU fixes off) -kokenjr

Rush Down

Rush Hour

S.C.A.R.S.

**Saber Marionette J - Battle Sabers (J)** Works perfectly with v18 default settings -ghaleon1103

Sabrina the Teenage Witch: A Twitch In Time

**Saga Frontier I** - (IMG/CUE/CCD/SUB) - Works great with standard BIOS settings. Music plays super fast though so put on the Inuyasha Battle fix and the best sound settings and when you start it up the music sounds good. Played through beginning and several battles. (v18) -ressurrectionx

**Saga Frontier II** - (IMG/CUE/CCD/SUB) - Works great with standard BIOS settings. Played about 10 minutes. (v18) -ressurrectionx

**Saiyuki: Journey West** - (IMG/CCD/SUB) - Works with standard BIOS settings. Music plays to fast and skips in FMV and some story sequences. Could not find a proper fix. Weird text glitch while you're talking where it overwrites previous text. Other than that, gameplay seems really good and music doesn't mess up while you're battling. It looks like a pretty good Final Fantasy Tactics clone. Played the first two battles. (v18) -ressurrectionx

**Salamander Deluxe Pack** IMG/CCD/SUB/CUE Includes Salamander, Lifeorce & Salamander 2; Runs perfectly with standard bios settings (v18) -sotu

Saltwater Sport Fishing

Sammy Sosa High Heat Baseball 2000

Sammy Sosa High Heat Baseball 2001

Sammy Sosa High Heat Baseball 2002

Sammy Sosa's Softball Slam

**Samurai Deeper Kyo** Works fine in both Bios/HLE. All CPU fixes off -kokenjr

**Samurai Showdown: Warrior Rage** - (BIN/CUE) - Works with Standard BIOS settings. Menus are all bad and title screen is bad. Hard to navigate where you want to go. Scenes between fights are all garbled too. (v18) -ressurrectionx

**Samurai Showdown III** - (IMG/CUE/CCD) - Works great with standard BIOS settings. Use old frame skipping and turn lazy screen updates on. Played several fights without any problems. (v18) -ressurrectionx

**Samurai Spirits 4 Special** - works perfect (turn off frame skip, turn off frame limits, turn on lazy screen updates) - Stevacus  
San Francisco Rush

**San Francisco Rush - Extreme Racing** - Developer intro is somewhat graphically messed up. Slight graphical anomalies that are barely noticed. Perfectly playable. 95% (Lazy screen updates, old frameskipping, Dark Forces fix, framelimit) -darkstalker

Scooby Doo Classic Creep Capers

**Scooby-Doo and the Cyber Chase** - Works 100% -ravage73

**Scrabble** Bin/Cue Runs Flawlessly with Standard Bios Settings (v18) -sotu

Sea-Doo HydroCross

Sentient

**Sentinel Returns** Works damn near perfectly with default settings. Tested on v18 -barman1176

Sesame Street Sports

**Sexy Parodius** (IMG/CCD/CUE/SUB) Works Perfectly with standard bios settings All Graphics Fixes to OFF (v18) -sotu

**Shadow Man** (BIN/CUE) Works perfectly with standard bios settings (v18) -sotu

Shadow Master

**Shadow Tower: Kings Field III** - (IMG) - Works with standard BIOS settings. FMV looks great. Smooth gameplay. Played about 10 minutes. (v18) -ressurrectionx

**Shaman King (J)**- 99.9% Make sure to turn off all CPU fixes. Works in both HLE/BIOS mode. When the title screen first appears in HLE mode a man's voice is heard saying "Shaman King...", but in BIOS an adolescent's. I personally prefer HLE -kokenjr

Shanghai True Valor

Shao Lin

**Sheep** - (IMG/CCD/SUB) - Works with standard BIOS settings. Disable CDDA to get rid of the loud buzzing noise because music doesn't work. Played about 5 minutes with no problems. (v18) -ressurrectionx

**Sheep Raider** Does not appear to work whatsoever, regardless of settings. 0% -darkstalker

Shellshock

Shipwreckers

Shockwave Assault

SideWinder

**Silent Bomber** Yes, works 99%; minute frameskip issues -rileg // Controls sometimes become unresponsive in Bios, HLE doesn't seem to have that problem (v18) -BrokenWing Mike

**Silent Hill** Runs a little too fast, but no problems that I encountered. The sound bug seemed to have been fixed. Only tested with default settings on v18 -Hawke213x

**Silent Hill PAL** - Yes, works perfectly, played for 90 mins..no issues - lantus

**Silhouette Mirage** Briefly tested, no problems with these settings: Bios mode, framelimit on, disable CDDA on, Sound Method Threaded (v18) -Lepain

**Silverload** BIOS Mode. No GFX glitches, but it plays 2 sound channels at once, while characters are talking. Adjusting sound balance as you go works. -Beelzebud

**Sim Theme Park** Mdf/Mds Runs perfectly with Standard Bios Settings, turn Frameskip OFF, Sound Timer Method to ORIGINAL (v18) -sotu

**SimCity 2000** - (BIN/CUE) - No picture with standard BIOS settings. Game freezes immediately in HLE. (v18) -ressurrectionx

**Simple Series Pro Wrestling 2100** Yes, works a tad bit slow -spite

**Simpsons Wrestling** - (BIN/CUE) - Works great with standard BIOS settings. Wrestled 4 or 5 rounds without a problem. (v18) -

ressurrectionx

Skeleton Warriors

**Skull Monkeys** Works perfect in bios/HLE with default settings -deathx88

**Skull Monkeys PAL** Yes, works fine on both HLE and BIOS modes -jizzlobber

Sky Diving Extreme

Slam n Jam 96

Slamscape

**Sled Storm** - (IMG/CCD/SUB) - Works with standard BIOS settings. Disable CDDA to get rid of buzzing because music doesn't work.

Gameplay is smooth and voices are good. Menu screens tend to flash a strobe effect. (v18) -ressurrectionx

Small Soldiers

**Smash Court Tennis 2 (J)** Runs a Little slow, and some graphics problems -radius

**Smurf Racer (bin/cue)** Use "Analog" as controller setting as it will enable you to use the joystick. Set framelimit = off and frame skipping = on for it to run a bit smoother (v18) -taonaut

**Smurfs - The Working** only in BIOS mode -\_DiMoN\_

Sno Cross Championship Racing

Snowboarding

**Sonic Wings Special - (J)** [SLPS-00307] (BIN/CUE) Works perfect with default settings (v18) - Retroplay

**Sorcerer's Maze** - (BIN/CUE) - Plays perfect with standard BIOS settings. Played 5 or 6 levels with no problems at all. Arkanoid clone game. (v18) -ressurrectionx

**Soukyu Gurentai - (J)** Works using BIOS only. Disable CDDA and enable Ine Yushi Sengoku battle fix. This will stop you from losing control over your ship but you may want to disable framelimit to compensate for the speed hit you will get from using it - El Noel

**Soul Blade** - (IMG/CCD/SUB) - Works with standard BIOS settings. FMV looks great. Old Frame skipping and lazy screen updates on. Disable XA sound processing. Now this game will play at 100% speed. Played several battles without any problems with these settings. (v18) -ressurrectionx

**Soul Blade PAL** - Yes, but Menu and Ingame very slow, Intro OK - Freakdave

**Soul of the Samurai** - (IMG/CUE) - Works great with standard BIOS settings. FMV looks and sounds great. Gameplay is very smooth. Played for about 5 minutes. (v18) -ressurrectionx

**South Park** - (IMG/CUE/CCD/SUB) - Works great with standard BIOS settings. Played 3 levels and have not had any problems. (v18) -ressurrectionx

**South Park Rally** - (BIN/CUE) - Works with standard BIOS settings. Theme song will play but the screen is stuck on the guy singing. You can just press the button and skip it though. Disable CDDA because the music in race will skip anyways and it will play smooth. Played 2 races with no other problems. (v18) -ressurrectionx

**South Park: Chefs Luv Shack** - (BIN/CUE) - Game freezes in BIOS mode with standard settings. Freezes the Xbox in HLE mode with standard settings. (v18) -ressurrectionx

**Soviet Strike** - (IMG) - Does not work in either BIOS or HLE mode. Game just hangs while loading any mission. (v18) -

MysteryMan2K8

Space Debris

**Space Griffon VF-9** (IMG/CCD/SUB) Seems to run fine with standard bios settings, takes a sec for the controls to become functional. Minor in game glitch (v18) -sotu

**Space Hulk - Vengeance Of The Blood Angels** (Bin/Cue) - Almost 100%, speech is messed up, tried different configs but no luck, it's fully playable though (v18) -Retroplay

**Space Invaders** - (IMG/CUE/CCD/SUB) - Freezes game with standard BIOS settings. Freezes Xbox with standard HLE settings. (v18) -ressurrectionx

**Space Jam** YES-Works in BIOS, has minor sound glitches with the announcers - mars10

**Spawn The Eternal Works** Nice BIOS mode; HLE mode stops after the intro -prican24

**Spec Ops: Ranger Elite** Yes, boots in BIOS only- razorriffh

Spec Ops: Airborne Commando

Spec Ops: Covert Assault

Spec Ops: Stealth Patrol

**Speed Punks** - (IMG/CCD/SUB) - Works with standard BIOS settings. Turned on frame skipping, old frame skipping and lazy screen updates. Also turned off CDDA and XA audio. Now the game runs at probably 90% so it is playable. (v18) -ressurrectionx

Speed Racer

**Speedball 2100 (PAL)** (BIN/CUE) Does not work, freezes to black screen (v18) -sotu

**Spice World** - (IMG/CUE/CCD/SUB) - Works with standard BIOS settings. Videos are okay unless you use the throttle. (v18) -ressurrectionx

Spider

**Spider-Man** IMG/CCD/SUB Works in bios mode with standard settings but sound is a little choppy and there are missing building textures so it's difficult to move around without dying. Disable CDDA turned ON (v18) -sotu

**Spider-Man 2 Enter Electro** Yes, Graphics are slow. Sound choppy. Cutscenes good but with choppy sound - DMagic1

Spin Jam

**Spongebob Squarepants** IMG/CCD/SUB Works perfectly with standard bios settings, Voice overs are a little choppy but not too bad, game plays great! (v18) -sotu

Sports Car GT

Spot Goes To Hollywood

Spyro Collectors Edition

**Spyro the Dragon I** - (IMG/CUE/CCD/SUB) - Works perfect with standard BIOS settings. Played for about 30 minutes with no problems. Very smooth gameplay and voices sync nicely. (v18) -ressurrectionx

**Spyro the Dragon II: Riptos Rage** - (BIN/CUE) - Works great with standard BIOS settings. Little to no lagging throughout the gameplay. Played about 30 minutes. (v18) -ressurrectionx

**Spyro III: Year of the Dragon** - (BIN/CUE) - Works with standard BIOS settings. CDDA doesn't work so you have to turn it off. Voices are all screwed up. Gameplay otherwise seems alright. Only played about 2 minutes. (v18) -ressurrectionx

**Stahlfeder (J)** - Works nearly perfect in BIOS mode. Occasional slight music stutter. -thraxen

**Star Gladiator: Episode 1** - (IMG/CCD/SUB) - Works with standard BIOS settings. FMV looks good, but sound skips just a little bit. Fighting seems to be very smooth and music sounds good during game. (v18) -ressurrectionx

**Star Ocean Second Story NTSC & PAL** crashes in the first battle in both bios and hle mode V2 & V1 tested with lots of settings - boo\_se // Confirmed still not working in v18 -BrokenWing Mike

Star Sweep ( Puzzle )

**Star Trek Invasion** Disable frameskip and enable old frameskip Rest all default CDDA music in game doesnt work Voices start to narrate passages of text but quickly cut off Sometimes during ship to ship communications voices can be heard with some glitching in audio and communications box with the faces Other than that plays very smoothly with only an occasional skip during graphically intense moments like closeup explosions (v18) -barman1176

**Star Wars: Dark Forces** - (IMG/CCD/SUB) - Works great with standard BIOS settings. Use Dark Force Fix. (v18) -ressurrectionx

**Star Wars: Demolition** - (IMG) - Works with standard BIOS settings. No music when playing actual demolition part or in Jabba's palace. Played about 3 minutes. Gameplay is a little choppy. (v18) -ressurrectionx

**Star Wars: Jedi Power Battles** - (IMG/CCD/SUB) - Works great with standard BIOS settings. Seemed to have a few problems with the controls, but not too bad. Played for about 10 minutes. (v18) -ressurrectionx

**Star Wars: Masters of Teras Kasi** - (BIN/CUE) - Works with standard BIOS settings. Disable CDDA because music skips. Fights are near 100% smooth then. I played a few fights. (v18) -ressurrectionx

**Star Wars: Rebel Assault II - The Hidden Empire** - (2 Disks - BOTH: BIN/CUE) - Doesn't work with standard BIOS settings. Videos work, but the voices are very much out of sync. Menu screens flicker. Gameplay is just a black screen with music, sound effects and voices in the background. HLE just locks the game up. (v18) -ressurrectionx

**Star Wars: Episode 1: The Phantom Menace** No Good in HLE or Bios-suprdave

Starblade Alpha

Starfighter Savein

Starwinder The Ultimate Space Race

**Steel Harbinger** Bin/Cue Runs Perfectly with Standard Bios Settings (v18) -sotu

Steel Reign

Streak: Hover Board Racing

Street Fighter Alpha

**Street Fighter Alpha 2** 100% - jammi

**Street Fighter: Alpha III** - (BIN/CUE) - Works perfect with standard BIOS settings. Played several fights. (v18) -ressurrectionx

**Street Fighter: Collection I** - (2 Disks - BOTH: BIN/CUE) - Works with standard BIOS settings. Turn CDDA off because music skips. Played 3 fights. UPDATE: Disk 2 works perfect with standard BIOS settings. (v18) -ressurrectionx

**Street Fighter: Collection II** - (IMG/CCD/SUB) - Works with standard BIOS settings. Music seems to be playing a little fast, but other than that no complaints. Played several fights. (v18) -ressurrectionx

**Street Fighter EX Plus (J)** 100% -jammi

**Street Fighter EX Plus Alpha** Plays great on both modes -prican24

**Street Fighter: EX II Plus** - (BIN/CUE) - Works great with standard BIOS settings. Smooth gameplay and good sound. I played several fights. (v18) -ressurrectionx

**Street Fighter EX 2 Plus Alpha** Yes, Works, but too slow to run -blitz6

**Street Fighter Zero 3 (J)** works fine on HLE, slight framerate drop but all good, Tested on v1.3 -Liam\_UK

Street Racer Deluxe

Street Sk8er

Street Sk8er 2

**Strider I** - (IMG/CUE/CCD/SUB) - Works perfect with standard BIOS settings. Played through the first level without any problems. (v18) -ressurrectionx

**Strider II** - (IMG/CCD/SUB)[/b] - Freezes the Xbox immediately in both BIOS and HLE modes. (v18) -ressurrectionx

Strike Point

**Striker Pro 2000** Bin/Cue Works perfectly in Bios mode, normal settings (v18) -Lukaz

**Strikers 1945** Yes, WORKS 100% in bios mode , full speed, music and all : Even better than te "PSX" versions !!! -sunseeker

Stuart Little 2

**Sub Commander (PAL)** Runs very nicely with default settings; slight skipping in FMV's. Noticed no skipping or glitching in-game...95%. Tested on v18. -barman1176

**Suikoden** work perfect with the default setting Cleared the game with no problem at all \*v10\* -break

**Suikoden 2** work perfect with the default setting Cleared the game with no problem at all \*v10\* -break  
**Suikogaiden vol.1 (J)** Won't load (v18) -Mandoz  
Super Bike 2000  
**Super Bubble Bobble-** YES - Jujupinto85  
**Super Pang Collection** Dosen't work at all -Kacique  
**Super Puzzle Fighter II Turbo** Yes ,works like a charm no tweaking needed -reli  
**Super Robot Wars Alpha Gaiden** Plays perfectly in BIOS mode, controller non-responsive in HLE Mode. May need frame skipping on -ranmaru  
**Super Robot Wars F Final (J)** - With BIOS mode it gets to the title screen, and character naming screen, then hangs after that. doesn't work in HLE either -killakraken  
Super Shot Soccer  
Supercross 2000  
Supercross 2001  
Supercross 98 w / Jeremy McGrath  
Supercross Circuit  
Superman  
Surf Riders  
**Suzume Taizen Pazurudama (J)**IMG/CCD/SUB Works perfectly with standard bios settings. Addictive Japanese Puzzle game (v18) -sotu  
Swagman  
Sydney 2000 Olympic Games  
**Syndicate Wars** Yes, works -Xdelusion  
**Syphon Filter** Bios/HLE-shows 989 intro then crashes -deathx88  
**Syphon Filter PAL** No, crash in HLE mode, shows 989 intro then crashes in BIOS -lantus  
**Syphon Filter 2** Didn't load in Either Mode -dmagic1  
**Syphon Filter 3** No, wont load at all -ingesuma  
T'ai Fu W-O-T-T  
T.R.A.G. Mission Mercy  
**Tactics Ogre** It does now work in the newer pcsxbox version (v18), got to chapter 2 so far: core 1.4, gpu 1.12, spu 1.6, everything else default -Potman  
T'ai Fu  
**Tai Fu PAL:** Works great in bios mode, default settings, old frameskip on -running with scissors  
Tail Concerto  
Tail of the Sun  
**Tales of Destiny** [SLUS-00626] (BIN/CUE) - Frameskip OFF/old Frameskip ON/BIOS/Core 1.5/GPU 1.16/SPU 1.6/Sound Timer Method Original - Perfect with v18 -Retroplay  
**Tales of Destiny II** (3CD) [SLUS-01355][SLUS-01367][SLUS-01368] (IMG/CUE) - Works fine with standard bios settings, there's minor audio hiccups in FMV sequences but nothing serious (v18) -Retroplay  
**Tarzan** Works Awesome -Crash N Burn  
**Team Buddies** Yes, single player wont work, multiplayer works though. Graphics slow down when shooting weapons. – timdotexe  
Team Losi RC Racer  
Tecmo: Deception  
Tecmo: Deception 3 Dark Delusion  
Tecmo: Stackers  
Tecmo: Super Bowl  
Tecmo: World Golf  
**Tekken** Works great in both modes but theres no music -prican24  
**Tekken PAL** - Works with no graphics errors. - Dante Ali  
**Tekken 2** HLE: Crash, Bios: Runs ~Graphics very slow. Music skips. -erexx  
**Tekken 2 PAL** - Works but with minor graphics errors - Dante Ali  
**Tekken 3** BIOS mode, it works ok, little bit glitchy, I find turning off XA processing makes the game run smoother but you lose music and sound during cut scenes. Also, game locks up once you hit rolling credits (v18) -Lukaz  
**Tekken 3 Demo (Collectors Edition - Pal):** Bios - Wont Load, HLE - Menu Works, gameplay is slow, music is choppy -t!dus\_beta  
**Tekken 3 (J)** Yes, works great, slows down sometimes -faceless  
**Tekken 3 PAL** -Will not boot in Bios or HLE modes -fOzf8 \*v2\***Tempest X3** No, Runs ~Graphics very slow. Music skipps. Crashes after Intro -erexx (HLE/BIOS).  
**Tempest X3 PAL** No, Shows trademark screen and then shows nothing but a black screen. (HLE/BIOS)- Dante\_Ali  
**Ten Pin Alley** Yes, works good, but a little slowdown graphic wise. Still it works well. –igotgame  
**Tenchu 2: Birth of the Stealth Assassins** Yes, works in HLE and BIOS - MissSplitch  
**Tenchu: Stealth Assassins** Yes, Games plays damn near perfect (Use Bios) –damage  
**Tenchu: Stealth Assassins (J)** HLE/BIOS: works, a little slow –Qba  
Tennis

Tennis Arena

**Test Drive 4** No, Locks up in HLE and BIOS- suprdave

**Test Drive 5** Excellent on bios mode (v18) -siudym

**Test Drive 6** - Intro runs fine, occassional sound lag and skips, but otherwise plays fine. -chillin\_dude

Test Drive Le Mans

Test Drive Off Road

Test Drive Off Road 2

Test Drive Off Road 3

**Tetris Plus** (both ccd/img/sub and bin/cue versions) Works for me both in BIOS and HLE mode (v18) -taonaut

**The Billiards** (BIN/CUE) Works perfectly on BIOS mode, haven't tested HLE (v18) -Lempt

The Final Round

**The Real Tetris PAL** - no, Hung on intro movie (Bios) - seph200x

**The World Is Not Enough** Crashes at first load screen in both modes. -M@gnus

Theme Aquarium

**Theme Hospital** - Seems to work fine -SHIZNO

**Theme Park** - Works in v18: core 1.4, gpu 1.12, spu 1.16, everything else default -Potman

Thomas Big Hurt Baseball

**Thousand Arms** Seems to lock up after the first Text box after the game starts in both BIOS and HLE mode -ranmaru

**Thrasher: Skate & Destroy** - Works great in bios mode, locks up in hle. to make it run smoother disable frame skip and frame limit. old frame skip = on. -boo\_se

**Threads of Fate** - Works good in bios Mint's Quest runs perfect but Rue's quest seems to get stuck when he leaves the cabin in the first scene no way to get past it. -gamemaster14

**Thrill Kill (Beta1)** Works with Bios/HLE, all options turned on, press back+start at intro - Wickedonealso

**Thrill Kill (Final)** - Works Perfect in bios mode CDDA music runs close to perfect a few skips or cracks but nothing major. - gamemaster14

**Thunder Force V: Perfect System**BIN/CUE Works perfectly with standard bios settings but sound is a little choppy. Turn Frameskip and Framelimit OFF for best performance/visuals (v18) -sotu

**Thunder Force V Perfect System (J)** Yes, 100% - jammi

Thunder Strike

Thunder Truck Rally

**True Pinball PAL** Yes, works perfect but no music sound fx are there - jammi F

Tunnel B1

Turbo Prop Racing

**Twisted Metal** Works; BIOS Mode; Enable Old Frame Skipping or menus won't be visible; disable CDDA, Frame Skip On, Frame Limit On -Thraxen

**Twisted Metal 2** - Works; BIOS Mode; Old Frame Skipping Enabled, disable CDDA (music is choppy anyway, plus gives a speed boost), Frame Skip On, Frame Limit On -Thraxen

**Twisted Metal 3** Unplayable in HLE, Playable in BIOS

**Twisted Metal 4** Fine in Both Modes, Frames rates not up to par. -skeen

**Ultimate 8 Ball** BIN/CUE Works perfectly with standard bios settings, turn Frameskip OFF (v18) -sotu

**Ultimate Fighting Championship** BIN/CUE Runs perfectly with standard bios settings (v18) -sotu

**Um Jammer Lammy** (BIN/CUE) Default settings + "Sound Timer Metod: Original" + "IRQ in Decoded Sound Buf (CrashTeamRacing): On" (v18) -taonaut

**Umihara Kawase Syun (Shun)** - ISO Awesome Japanese Platformer Works perfectly with standard bios settings (v18) -sotu

Unholy War - The

Uprising X

**Urban Chaos** Yes,Crashes in HLE, Works fine in BIOS

V I P

**Vagrant Story** Works perfect in Bios, core:1.4, gpu:1.12, spu:1.6, wait cpu action:on (v18) -Mandoz

**Valkyrie Profile** US version plays but the battles are slow (under 20 fps) and choppy with cursors missing but completely playable. Outside battle game playing pretty near 60 fps - seanp2500

**valkyrie profile - (J)** - works fine but voices are delayed and choppy, video/fmv seems to not be affected, only in game voices - elietehatelier

**Vampire Hunter D** works fine in BIOS mode, but menu screen does NOT appear. You have to keep pressing start to get into the game. -mecca

**Vanark Astro Trooper** BIN/CUE Game runs good enough with standard Bios settings, Frameskip OFF and if you want it to run really fast turn Framelimit OFF. The simulator doesn't start for me. Not extensively tested (v18) -sotu

**Vandal Hearts** Worked alright in BIOS Mode, it seems to take the enemies forever to attack. -lepain

**Vandal Hearts 2** BIOS - Working fine, HLE - Working fine, but some slow down on movie sequences –IceWolf

**Vanguard Bandits** IMG/CCD/SUB Runs Perfectly with standard bios settings. Turn Frameskip and Framelimit off if you want it to run faster. Excellent game btw!! (v18) -sotu

Vanishing Point

**Vegas Games 2000** Yes, Works good but major stuttering, could be my xbox HD. –blitz6

**Viewpoint** Yes, HLE & BIOS - NO BGM, Sounds yes, Game 100% -NeoCverA

**Vib Ribbon PAL** - Bios/HLE- works at title screen, but locks up at the loading screen -deathx88

**Vigilante 8** - BIOS Mode - Menu loads, but game locks up when loading first level, HLE doesn't work at all - Thraxen

**Vigilante 8: Second Offense** Works somewhat in BIOS mode. I didn't get too far in HLE mode, Bad audio glitches in both. Can be fixed by turning off CDDA, Menus are difficult to navigate, glitches in the opening FMV, I only got as far as loading the match, then I get a blank screen and the emulator freezes -Lucied

**Virtual Sex** works really well in bios mode and are great icebreakers at formal parties -running with scissors

**Virtual Sex with Jenny 2** work really well in bios mode and are great icebreakers at formal parties -running with scissors

Virtual Tennis

Virtual Kasparov

VIVA Soccer

VMX Racing

VR Baseball '97

VR Baseball '99

VR Golf

VR Pool

VR Power Boat Racing

V-Rally '97 World Championship

Vs

War Games Defcon 1

**War Gods** IMG/CCD/SUB/CUE Runs perfectly with standard bios settings Frameskip OFF (v18) -sotu

**Warcraft II Dark Saga** Seems to run pretty near to perfect in BIOS mode -lepain// ISO Gets stuck at LOADING screen (v18) -sotu

Warhammer Shadow of the Horned Rat

Warhammer II Dark Omen

**Warhawk: The Red Mercury Missions** Somewhat, (HLE and BIOS ran) FMV runs fast sound tries to catch up -NeoCverA

Warpath: Jurassic Park

**Warriors of Might & Magic** BIN/CUE Does Not Work, Freezes at the intro splash screen (v18) -sotu

**Warzone 2100** works like a charm in HLE. It freezes up when you used too many cheats -slikmastah

WCW Backstage Assault

WCW Mayhem

**WCW Nitro** Works with BIOS (default settings) with a sound problem (makes buzzing sound) besides that, plays perfectly (v18) - Liquidvlade Hiraduo

**WCW vs. NWO Thunder** Yes, Works ok, but too much frameskip –Sighting

WCW vs. The World

Weakest Link - The

WF Wrestlemania: The Arcade Game

**Wheel of Fortune** Runs but very sloooow –Aussie18

Wheel of Fortune 2

**Who wants to be Millionaire** No, Hangs on Checking Disc Screen – dreddy

**Who wants to be Millionaire (J)** works with BIOS. Sound ok, some grfx errors. Still very playable though. - Sapulii

Who Wants to Be a Millionaire 2nd Ed.

Who Wants to Be a Millionaire 3rd Ed.

**Wild 9** Works in Both Modes No Music –skeen

**Wild Arms** - Starts up and appears to play fine for a while, but will crash in certain shops and when adding spells to your crest. It also crashes at certain points in the story line -dragon\_788

**Wild Arms 2** Worked under HLE and Bios - Stryfe01

Wild Thornberrys Animal Adventure

**Williams Arcade's Greatest Hits** Yes, All games and visuals work perfectly. No sound in the designers' movies -Dahak

Wing Commander 3

**Wing Commander 4: The Price of Freedom - PAL** - works using BIOS only. You must disable all graphics fixes apart from frameskip. Game will crash at the end of the first scene so watch it once, reset, then skip it the next time and the game should play fine from then on - El Noel

**Winning Eleven 2000** BIN/CUE (CDRWin) run a bit faster than usual, but you can make it run slightly slower if frameskip is disabled and framelimit is enabled (v18) -Lempt

**Winning Eleven Liga Mexicana** BIN/CUE (CDRWin) run a bit faster than usual, but you can make it run slightly slower if frameskip is disabled and framelimit is enabled (v18) -Lempt

**Wipeout 2097 PAL** Works (disabled Frame skipping and frame limiting)- Dante\_Ali  
**Wipeout** Goes to a black screen after the intro in both modes -prican24  
**Wipeout PAL** - Works (disabled Frame skipping and frame limiting) - Danti Ali  
**Wipeout 3** HLE mode crashes at first loading screen; BIOS mode just stays at the second loading screen -prican24  
**Wipeout 3 Special Edition** Yes, in BIOS Mode Only. 75% Speed, No MusicEd\_209  
**Wipeout XL** Doesn't load in either mode -prican24  
**Wolf Fang (J)** SHUMP BIN/CUE Works perfectly with standard bios settings, Frameskip & Framelimit OFF (v18) -sotu  
**Woody Woodpecker Racing** BIN/CUE Runs perfectly with standard settings, Frameskip OFF (v18) -sotu  
World Cup 98  
World Cup Golf Pro  
World Destruction League: Thunder Tanks  
World Destruction League: War Jetz  
World's Scariest Police Chases  
**Worms Armageddon** works just fine. Used CDRWin for image and loaded w/bios file. Also, change memory card to 10. No problems. -metallica3597  
**Worms** Yes, worked in BIOS – timdotexe  
**Worms Pinball** No, did not work –timdotexe  
**Worms World Party** Works in Bios mode. It will take a long time to load after the image is booted, but it will run.  
Wreckin Crew: Drive Dangerously  
**Wu Tang: Shaolin Style** No, Load intro, dies when loading game – dready  
**WWF Attitude** Works in Bios mode. Gfx are a bit off and there is no entrance music -andy dope  
**WWF In Your House** - Works, but background are corrupted -SHiZNO  
WWF Smackdown  
**WWF Smackdown 2: Know Your Role** (ccd/cue/img/sub), works fine, even better with frameskip on and framelimit off. Multitap-option works, although you need to have the controllers set as all(?) standard or analog for player 3 and 4 to be able to play (v18) -taonaut  
WWF Warzone  
**X2 (J)** BIN/CUE Works perfectly with standard bios settings turn Frameskip OFF. Very Difficult Japanese SHUMP (v18) -sotu  
**X2 - No Relief (NTSC-J) [SLPS-00766]** (BIN/CUE) - Missing/corrupted text in menu, ship disappears for a few secs if you get hit (v18) -Retroplay  
**X-Com: UFO Defense** I've tested Xcom numerous times and that game does not work. It loads but very early on just after establishing a base and around first alien contact it freezes (v18). -sotu  
X Games Pro Boarder  
Xbladz In Line Skating  
**Xena Warrior Princess** Yes, works great, choppy sound during titles and fmv -Dahak  
**Xenogears** - works just fine in BIOS mode, I played it from beginning to end with just the default graphic fixes on. -xenocida  
**Xvious 3D/G+** Works in both HLE and BIOS mode, playable but a bit slow –cescone  
X-Files  
**X-Men: Children of the Atom** BIN/CUE Does not work, freezes immediately (v18) -sotu  
**X-Men: Mutant Academy** BIN/CUE Works perfectly with standard bios settings (v18) -sotu  
**X-Men: Mutant Academy (J)** No Dose not Work –jammi  
**X-Men: Mutant Academy 2** IMG/CCD/SUB/CUE Runs near perfect in standard bios mode, turn Frameskip OFF for best animation. For speed you can either turn framelimit OFF or turn Disable CDDA ON. Very nice game, fighting tempo of Tekken (v18) -sotu  
**X-Men: vs Street Fighter** Yes, 100% with both HLE and BIOS –eclipse  
**You Don't Know Jack** No, Game starts, get legal warning, then weird grey gradients that you cannot escape. -falz // MDF/MDS Confirmed not working in v18 -sotu  
**You Don't Know Jack - Mock 2** IMG/CCD/SUB Loads and gets stuck at a morphing grey screen (v18) -sotu  
**Yu-Gi-Oh! Forbidden Memories** Works perfect in HLE and bios but crashes when saves are loaded in HLE. You can only Load saves properly in Bios -gamemaster14 // Confirmed working with standard settings in v18 (img/ccd/sub) -sotu  
**Zanac X Zanac (J) ntsc**- Works fine with BIOS, locks sometimes with HLE -haileymegs  
**Zero Divide** MDF/MDS Gets stuck at LOADING screen (v18) -sotu  
**ZoBooMaFoo Leapin Leamurs** MDF/MDS Gets stuck at LOADING screen (v18) -sotu  
Zoop
